General Admission Requirements and Procedures

1. General Admission Requirements

Persons wishing to follow programs of study leading to a degree or certificate must be formally admitted to the University.

Persons wishing to register in degree-credit courses without having been formally admitted to the University may do so as Special students. See Section 17 below, Special Studies (Non-Degree), for more information.

An overall average of at least 70% is normally required to be considered for admission. Some programs may also require specific course prerequisites and/or supplementary admission portfolios. Higher averages are required for admission to programs for which the demand for places by qualified applicants exceeds the number of places available. The overall average required for admission is determined each year on a program by program basis. Consult admissions.carleton.ca/requirements for further details.

Applicants should note that meeting the minimum requirements of a program does not guarantee admission to the University. Applications from students whose grades do not meet the requirements in a given year or program will be considered individually. Students in this category may be asked to provide additional information to assist the University in determining where there are special circumstances that would permit their admission to Carleton.

This publication contains admission requirements for the 2008-2009 academic year only. Students wishing to apply for 2009-2010 should contact Admissions Services for information on requirements and procedures.

Individuals who are in any doubt about their eligibility for admission are encouraged to inquire at Admissions Services.

2. Accessibility for Students with Disabilities

Carleton University is committed to making reasonable accommodation to individuals with disabilities, and actively encourages application from students with disabilities. This commitment includes gaining an understanding of the circumstances of an individual's disabilities and adjusting services to all academically qualified individuals to compete on an equitable basis.

Students are encouraged to contact the Paul Menton Centre for Students with Disabilities for further information to enable them to assess the extent to which specialized services will be available.

Academic accessibility is intrinsically linked to physical accessibility. Carleton is committed to continually monitoring and upgrading physical accessibility to whatever extent is possible.

A Senate standing committee monitors the needs and problems of students with disabilities in conjunction with their academic problems and makes recommendation for improvements.

3. Multiple Undergraduate Programs

Students who already possess an undergraduate degree, certificate, or diploma from another university or from Carleton University may apply for admission to a second undergraduate program. In such circumstances, to be eligible for graduation with an Honours degree students must present a minimum of 5.0 credits earned at Carleton University including at least 3.0 credits that are both in the Major and at the 3000-level or above. To be eligible for graduation with a General degree students must present a minimum of 5.0 credits earned at Carleton University including at least 3.0 credits that are both in the Major and at the 2000-level or above.

To be eligible for graduation with any degree with a Concentration, Specialization or Minor, students must satisfy the additional requirement that they present a minimum of 2.0 credits earned at Carleton University in each Concentration, Specialization or Minor.

Due to accreditation requirements, the minimum number of Carleton credits for students in the Faculty of Engineering and Design is half of the number of credits required in the program.

To obtain an undergraduate certificate from Carleton University, students must present a minimum of 4.0 credits taken at Carleton including all required courses. For a second or subsequent undergraduate program, the appropriate minimum number of Carleton credits must be met.

4. English as a Second Language Requirements (ESLR)

The language of instruction at Carleton University is English. In their own interest, students whose first language is not English must demonstrate that they can cope with the language demands of an English language university, and they can do so by following one of two options:

Option 1

In order to be eligible for admission to an undergraduate degree program at Carleton University without any English as a Second Language Requirement, all international applicants as well as Canadian citizens and residents whose first language is not English or French are required:

- a) to present official transcripts to indicate that they have studied for the last three years (full-time) in a high school, college or university in Canada, the United States, the United Kingdom or any other country in which the primary language is English and where the language of instruction in the relevant educational institution was exclusively English, or
- b) to present an official minimum 70 band score on the Canadian Academic English Language (CAEL) Assessment, or
- c) to present an official minimum score of 86 overall on the Internet-based (iBT) Test of English as a Foreign Language (TOEFL) with a minimum score in each component of: writing - 22, speaking - 22, reading - 20, listening - 20; or 237 on the computer-based Test of English as a Foreign Language (TOEFL); or 580 on the paper-based Test of English as a Foreign Language (TOEFL), or

- d) to present an official minimum score of 6.5 overall on the International English Language Testing System (IELTS) Academic Version, with a minimum score of 6.0 on each band, or
- e) to present an official minimum score of 85 with a minimum of 80 in each band on the Michigan English Language Assessment Battery (MELAB), or
- f) to have completed ESLA 1900 or ESLA 1905 with a final grade of B- or higher.

Applicants whose first language is French must present transcripts to indicate that they have taken four years of *anglais* (English) in a Canadian secondary school in order to be admitted without an English as a Second Language Requirement.

Option 2

Applicants whose first language is not English who do not meet the requirements stated in Option 1 may be offered admission to an undergraduate degree program or as a Special Student, with an English as a Second Language Requirement (ESLR). These applicants are required to:

- a) present an official overall score between 30 and 69 (with no band below 30) on the Canadian Academic English Language (CAEL) Assessment, or
- b) present an official overall score between 61 and 85 (with a minimum score in each component of 15) on the Internet-based (iBT) Test of English as a Foreign Language (TOEFL); or between 173 and 236 on the computer-based TOEFL; or between 500 and 579 on the paper-based TOEFL, or
- c) present an official overall score between 5.0 and 6.4 (with a minimum score in each band of 4.5) on the International English Language Testing System (IELTS).

Applicants with language scores within the above ranges may be permitted to begin their studies by registering in credit ESLA course(s) and a limited number of credit courses from their degree program until their ESLR is completed.

Students must be registered in and attending the required credit ESLA course(s) to be permitted to register in any other degree courses. Students who have not registered appropriately will be deregistered from all credit courses. This includes those students registered in credit courses without the required ESLA course registration and those registered in more non-ESL credits than their results indicate.

Students are expected to complete the ESLR within one calendar year of their initial enrolment in credit courses. In exceptional circumstances, permission to continue in a second fall/winter term registration in ESLA courses may be granted by the University's School of Linguistics and Applied Language Studies (SLALS).

Registration will be denied to students who have not satisfied the ESLR if they do not show continuous registration, attendance or progress in their required ESLA courses (as determined by SLALS).

Students who do not achieve the minimum final grade required to advance to the next level of an ESLA course after three attempts will not be permitted to register in any credit courses for one calendar year. Such students must take a SLALS-approved English language proficiency test before returning to their studies and must register according to their new placement.

Students considering a break in study of three terms or longer should contact SLALS to discuss their ESLR standing. After a break in studies, students may be required to re-take a SLALS-approved English language proficiency test before returning to their studies and register according to their new placement.

To satisfy the ESLR, students must earn a grade of B- or higher in either Advanced English as a Second Language for Academic Purposes (ESLA 1900) or in Advanced English as a Second Language for Engineering Students (ESLA 1905). Students are able to satisfy this requirement at any time during the year by achieving the minimum result required on one of Carleton University's approved English as a Second Language assessments. Refer to Option 1 for details on acceptable English language tests.

For further information regarding the English as a Second Language Requirement and admission, contact Admissions Services. For information on English as a Second Language credit courses and placement, contact the School of Linguistics and Applied Language Studies (SLALS).

5. Dates of Entry

Students may be admitted to register in January, May and July as well as in September. (See the Academic Year section of this Calendar.) It should be noted however, that a full range of courses is only offered during the fall/winter session, i.e. September to May.

6. Levels of Entry

When a student is admitted at the first-year level, the degree program is normally four years for an Honours degree and three years for a General degree with a normal course load. Beyond first year, remaining degree requirements are determined by the total number of credits required for that particular degree program less those credits granted on transfer from previous post-secondary studies.

7. Concurrent Studies

The Concurrent Studies program enables secondary school students to begin university-level study while completing any outstanding requirements for their high school diploma. The availability of the Concurrent Studies program will be of particular interest to those students in semestered schools who are not taking a full load of high school credits in their final year of study. Students in non-semestered high schools may also wish to take advantage of this opportunity in their final year if they are not taking a full credit load.

Students who wish to take advantage of the Concurrent Studies program will register as Special students. Special students may normally enrol in a maximum of 1.0 credit in each of the fall term, winter term and summer session. With admission to a degree program, program requirements for a degree will be reduced by the number of credits successfully completed as part of the Concurrent Studies program that are appropriate to the degree. Other universities normally grant credit on admission for courses taken at Carleton as a Special student.

8. Admission to Certificate and Diploma Programs

In addition to offering nineteen undergraduate degree programs, for which the admission requirements are stated on the following pages, Carleton offers three certificate programs and one diploma program. Please refer to the "Summary of Admission Requirements" for additional information.

9. High School Applicants

Ontario

The minimum admission requirements to be considered are:

- 1) the completion of the OSSD; and
- 2) six 4U/M courses, including specific program prerequisites.

The overall admission average and mix of 4U/M courses required is dependent upon the degree or program for which the student is applying. Detailed admission requirements for each undergraduate degree program can be found in the "Summary of Admission Requirements" following this section.

Holding the minimum admission requirements only establishes eligibility for consideration to Carleton University programs. Admission averages and required marks will vary from year to year and will be determined by the availability of places and by the number of applicants. The overall admission average may be higher than the stated minimum requirements.

Students who feel that their high school grade average does not reflect their potential are encouraged to apply to the Enriched Support Program. For more information, see the Enriched Support Program information following the Admissions section of this Calendar.

Carleton University uses, for admission purposes, the credit system as defined by the Ministry of Education, Universities and Colleges. In calculating averages, the weighting factor assigned to a subject will be directly proportional to the credit value of that subject.

Quebec

Students from the Province of Québec may apply for admission into first year either upon completion of the Grade 12 program or after completing work towards the Collegial diploma. (See the information on Québec CEGEPs in this section.)

Other Canadian Provinces

Applicants to degree programs at Carleton must normally be admissible to a university in their own province.

From the Canadian provinces and territories whose pre-university studies culminate in 12 years of schooling, graduates are considered for direct admission into first year. At the present time, graduates from high schools in the following provinces and territories are considered for admission. The overall average required is dependent upon the degree or program for which the students are applying.

Alberta

British Columbia and The Yukon

Manitoba

New Brunswick

Newfoundland and Labrador

Northwest Territories

Nova Scotia

Nunavut

Prince Edward Island

Saskatchewan

It is recognized that the curriculum of some provinces does not include an introductory course in calculus, or that a final-year mathematics course may have only a few weeks of an introduction to calculus, or that only a few schools in a particular province or territory may offer a calculus course to a selected group of students. In instances where no calculus is presented, and there is a requirement for it in the university program to which the student is admitted, adjustments may have to be

made to include MATH 0007 (Introductory Calculus) as an extra half-credit beyond the normal degree program requirements.

It should be noted that for some restricted-enrolment programs, preference may be given to applicants who, along with a high academic standing, have completed an introductory course in calculus.

The United States

1. Applicants who have completed Grade 12 in the United States or in a U.S. overseas school will be considered for admission to first year. The Grade 12 program must include at least four academic units, and a minimum of 16 academic units must have been completed in Grades 9 to 12.
2. An average of B- or higher is required for admission. For Honours programs and some limited enrolment programs, a higher average may be required.
3. Applicants are encouraged to submit SAT or ACT scores to supplement their application for admission to the University.

Advanced Placement (AP)

Applicants who have completed AP exams with a minimum grade of 4 will be granted appropriate advanced standing credit, subject to the discretion of the appropriate Faculty, to a maximum of 3.0 credits.

International Baccalaureate (IB)

Students applying on the basis of having completed the IB diploma must possess a minimum score of 28 points. Applicants should have completed the diploma with six subjects: three higher level (HL) and three subsidiary level (SL). Students should also include the specific subject requirements for the program for which they are applying among their higher level and subsidiary level subjects. Usually we expect prerequisite courses to be at the higher level. Students with a minimum score of 28 may be given transfer credit for higher level courses with grades of 5 or higher, to a maximum of 3.0 credits.

Other High School Systems

Applicants who have completed high school diploma requirements in other than Canadian or American high school systems will be considered for admission at the appropriate level of entry. Individuals from foreign systems of education will be considered for admission to first year only if they are able to present sufficient evidence that their secondary school background is appropriate to this level of entry with respect to academic content and level of achievement.

Generally speaking, such applicants must meet requirements for admission to a university in their own country.

The following certificates may be accepted to meet admission requirements to first year:

United Kingdom, West Indies, East and West Africa, Hong Kong: The General Certificate of Education (or the equivalent) with satisfactory standing in five subjects at Ordinary Level (or equivalent) and two suitable subjects at Advanced Level.

International: The International Baccalaureate.

10. Special Requirements for Overseas Students

Translation of Documents

The University must be in receipt of all official documents by May 1. Applicants from non-English speaking countries must arrange to submit certified English translations of their academic documents.

11. Transfers from Post-Secondary Institutions: General Information

Minimum Number of Carleton Credits

To be eligible for graduation with an Honours degree students must present a minimum of 5.0 credits earned at Carleton University including at least 3.0 credits that are both in the Major and at the 3000-level or above. To be eligible for graduation with a General degree students must present a minimum of 5.0 credits earned at Carleton University including at least 3.0 credits that are both in the Major and at the 2000-level or above.

To be eligible for graduation with any degree with a Concentration, Specialization or Minor, students must satisfy the additional requirement that they present a minimum of 2.0 credits earned at Carleton University in each Concentration, Specialization or Minor.

Due to accreditation requirements, the minimum number of Carleton credits for students in the Faculty of Engineering and Design is half of the number of credits required in the program.

To obtain an undergraduate certificate from Carleton University, students must present a minimum of 4.0 credits taken at Carleton including all required courses.

When a Faculty of the University further specifies "required courses", and detailed departmental requirements, such as Design Project or Honours Thesis, these must also be fulfilled.

12. Transfers from Post-Secondary Institutions: Universities

Carleton University subscribes to the following General Policy on the Transfer of Course Credits, as adopted by the Council of Ontario Universities:

Acceptance of transfer credits among Ontario universities shall be based on the recognition that, while learning experiences may differ in a variety of ways, their substance may be essentially equivalent in terms of their content and rigour. Insofar as possible, acceptance of transfer should allow for the maximum recognition of previous learning experience in university-level courses.

Subject to degree, grade and program requirements, any course offered for credit by one university shall be accepted for credit by another Ontario university when there is an essential equivalency in course content.

Please contact Carleton's Admissions Services for information about transferring specific courses.

Students applying from other recognized universities may be admitted if they are eligible to continue at the institution from which they wish to transfer and if they present an acceptable average.

An applicant who is attending or has attended institutions of post-secondary education must present:

- a) Official certified transcripts of academic records mailed directly to this University by the registrars of the institutions attended, and
- b) Applicants who have taken only one year of study past the secondary school level may be required to submit an official transcript of high school marks mailed directly to Carleton University by the high school concerned.

Credit may be received for courses taken at other recognized degree-granting institutions if:

- a) courses are relevant to a student's proposed program, and
- b) the appropriate department recommends that such courses be credited to a student's program. Each application will be evaluated on its own merits.

Students who apply for admission to an undergraduate degree program who already possess an undergraduate degree from either Carleton or another university, are required to complete a minimum number of Carleton credits. (See *Multiple Undergraduate Programs* in this section.)

13. Transfers from Post-Secondary Institutions: Ontario Colleges of Applied Arts and Technology (CAATs)

In-Program Applicants

Students from Ontario Colleges of Applied Arts and Technology who have not completed all requirements in a two- or three-year diploma program or a two-year diploma program and who present a minimum 3.0 grade point average (B standing in the Carleton University grading system) will be considered for admission to a degree program based on the following guidelines:

1. Applicants who present a minimum 3.0 G.P.A. and who have completed all diploma requirements except the last term/semester in a three-year diploma program will be considered for admission with advanced standing to a maximum of 5.0 credits (equivalent to one year). The advanced standing would be granted according to the appropriateness of the diploma program, the admission requirements of the degree program, and the achievement in relevant courses.
2. Applicants who present a minimum 3.0 G.P.A. and who have completed all diploma requirements except the last term/semester in a two-year diploma program will be considered for admission with advanced standing to a maximum of 3.0 credits. The advanced standing would be granted according to the appropriateness of the diploma program, the admission requirements of the degree program and the achievement in relevant courses.
3. Applicants who present a minimum 3.0 G.P.A. and who have completed two years of a three-year diploma program will be considered for admission with advanced standing to a maximum of 4.0 credits. The advanced standing would be granted according to the appropriateness of the diploma program, the admission requirements of the degree program, and the achievement in relevant courses.
4. Applicants who present a minimum 3.0 G.P.A. after the first year of a two- or three-year diploma program will be considered for admission to first year.

CAAT Graduate Applicants

Students from Ontario Colleges of Applied Arts and Technology who have successfully graduated in a two -or three-year diploma program and who present a minimum 3.0 grade point average (B standing on the Carleton grading system) will be considered for admission to a degree program based on the following guidelines:

1. Graduates of a two-year diploma program who present a minimum 3.0 G.P.A. will be considered for admission with advanced standing to a maximum of 5.0 credits (equivalent to one year).

The advanced standing would be granted according to the appropriateness of the diploma program, the admission requirements of the degree program, and the achievement in relevant courses.

2. Graduates of a three-year diploma program who present a minimum 3.0 G.P.A. will be considered for admission with advanced standing to a maximum of 7.0 credits. The advanced standing would be granted according to the appropriateness of the diploma program, the admission requirements of the B.A. degree program, and the achievement in relevant courses.

Other students presenting an incomplete program normally will not be considered for admission to Carleton University on the basis of that program. Such persons may inquire about possible alternatives if they are desirous of seeking admission to a Carleton University degree program at some future date.

14. Transfers from Post-Secondary Institutions: Quebec CEGEPs

Admission Requirements

1. A CEGEP applicant who has completed successfully 12 "General" or pre-university courses will be considered for admission to first year, without advanced standing. The overall average required and the advanced standing credits are dependent upon the degree or program for which the student is applying.
2. CEGEP applicants who have successfully completed more than 12 "General" or pre-university courses will be considered for admission with advanced standing based on the number of courses in excess of 12 and not to exceed the equivalent in credits of the first year of the program to which they are admitted. The overall average required and the advanced standing credits are dependent upon the degree or program for which the student is applying.

All applicants should note that failures in their CEGEP studies can adversely affect their admissibility.

The provisional approval will be given prior to the completion of the student's current year, and will provide a detailed statement of the credits to be granted upon transfer. Admission will be confirmed upon presentation of a final transcript that indicates the successful completion of all courses with suitable standing.

16. Mature Applicants

Mature Applicants are persons who satisfy all of the following requirements;

1. are 21 years of age or over by December 31 of the year in which they wish to enrol, and
2. are Canadian citizens or permanent residents of Canada, and
3. do not meet the normal admission requirements as published in this Calendar, and
4. have been away from full-time studies for a minimum of two calendar years, and
5. have not attended a university or college as full-time students.

Applicants who meet the definition of Mature Applicant will be considered for admission to a B.A. program in the Faculty of Arts and Social Sciences or in the Faculty

of Public Affairs, or to a degree program in Engineering, Architecture, Computer Science, Humanities, Industrial Design, Mathematics, Science, Information Technology, or Social Work.

These applicants are required to submit proof of age, biographical information and a transcript of their most recent studies.

Admission to the Faculty of Arts and Social Sciences, or to the Faculty of Public Affairs

Mature Applicants will normally be admitted to the first year of a B.A. degree program in the Faculties of Arts and Social Sciences or Public Affairs and Management, or the first year of the undergraduate degree program in Social Work if they have:

- a) secondary school graduation in an academic program (the overall average required is dependent upon the degree or program for which the student is applying), or
- b) completed, as a Special student at Carleton University, one appropriate full credit (or two half-credits) with C- or higher standing in the first attempt (or in both of the first two half-credit course attempts), or
- c) other academic or work experience which, in the opinion of the admissions committee, indicates a likelihood of success at university.

Note: Applicants to B.A. Biology must present a 4U (or equivalent) course in chemistry. Applicants to B.A. Economics must present a 4U (or equivalent) course in calculus.

Mature Applicants are not usually considered for admission to Honours programs in Arts and Social Sciences, Public Affairs and Management and to the programs in Business, Journalism, Music, or Public Affairs and Policy Management. If, however, at the end of their first year in another degree program, they meet the requirements for one of the above-mentioned programs, they can apply to transfer to that program.

Admission to the Schools of Architecture, Computer Science, and Industrial Design

Mature Applicants can be considered for admission to the first year in the Schools of Architecture, Computer Science, or Industrial Design if they have the prerequisite subjects for the program to which they wish to apply and if they have:

- a) secondary school graduation in an academic program (the overall average required is dependent upon the degree or program for which the student is applying), or

- c) other academic or work experience which, in the opinion of the admissions committee, indicates a likelihood of success at university.

The prerequisite subjects (4U or equivalents) for Architectural Studies, Computer Science, and for Industrial Design are found under Prerequisite Subjects at the end of this section.

Persons applying for admission to these undergraduate degree programs without the prerequisites will not normally be considered until the prerequisite subjects have been successfully completed. All applications are reviewed on an individual basis.

Admission to the Faculty of Engineering

Mature Applicants can be considered for admission to first year of a degree program in the Faculty of Engineering if they have the prerequisite subjects for the program and if they have;

- a) secondary school graduation in an academic program (the overall average required is dependent upon the degree or program for which the student is applying), or
- b) completed, as a Special student at Carleton University, one appropriate full-credit (or two half-credits) with a C- or higher standing in the first attempt (or in both of the first two half-credit attempts), or
- c) other academic or work experience which in the opinion of the admissions committee, indicates a likelihood of success at university.

The prerequisite subjects (4U or equivalent) for Engineering are found under Prerequisite Subjects at the end of this section. A grade of 60 percent or higher is required in each prerequisite subject.

Persons applying for admission to this undergraduate degree program without the necessary prerequisites will not normally be considered until the prerequisite subjects have been successfully completed. All applications are reviewed on an individual basis.

Admission to the Faculty of Science

Mature Applicants can be considered for admission to the first year of a Major program in the Faculty of Science if they have the prerequisite subjects for the program and if they have:

- a) secondary school graduation in an academic program (the overall average required is dependent upon the degree or program for which the student is applying), or
- b) completed, as a Special student at Carleton University, one appropriate full-credit (or two half-credits) with a C- or higher standing in the first attempt (or in both of the first two half-credit attempts), or
- c) other academic or work experience which in the opinion of the admissions committee, indicates a likelihood of success at university.

The prerequisite subjects (4U or equivalent) for Science are found under Prerequisite Subjects at the end of this section.

Persons applying for admission to this undergraduate degree program without the necessary prerequisites will not normally be considered until the prerequisite subjects have been successfully completed. All applications are reviewed on an individual basis.

Mature Applicants are not usually considered for admission to Honours programs in Science. If, however, at the end of the first year of a General program, they meet the requirements for one of the Honours programs, they can apply to transfer to that program.

Admission to the Bachelor of Information Technology

Mature Applicants can be considered for admission to first year of the Bachelor of Information Technology if they have the prerequisite subjects for the program and if they have:

- a) secondary school graduation in an academic program (the overall average is dependent upon the program for which the student is applying), or
- b) completed, as a Special Student at Carleton University, one appropriate full-credit (or two half-credits) with

a C- or higher standing in the first attempt (or in both of the first two half-credit attempts), or

- c) other academic or work experience which, in the opinion of the admissions committee, indicates a likelihood of success at university.

Special Students Wishing to Apply as Mature Applicants

Special students who meet all of the criteria for Mature Applicants can be considered for admission as Mature Applicants if:

- a) they have completed, as a Special student, at Carleton University, one appropriate full credit (or two half-credits) with a C- or higher standing in the first attempt (or in both of the first two-half credit attempts), and

- c) they have completed any additional degree program prerequisite subjects that may be required for a particular program.

Mature Applicants who, as Special students at Carleton University, have not obtained a grade of C- or higher in one full credit (or two half-credits), in the first attempt (or in both of the first two half credit attempts), can attempt to qualify for subsequent admission through additional courses as a Special student at the University.

Individuals seeking admission under the Mature Applicant status who need further information should inquire at Admissions Services.

17. Special Studies (Non-Degree)

Special students may be admitted to a degree program if their academic achievement at Carleton University indicates a reasonable probability of future academic success. Previous post-secondary studies at other institutions will also be taken into consideration at the time the application for admission is evaluated. Students with previous, unsuccessful post-secondary studies should contact the Admissions Services before attempting to qualify for admission on the basis of studies as a Special student.

In the Faculty of Arts and Social Sciences, Faculty of Public Affairs, and Faculty of Science, a Special student can normally be considered for admission to a General degree program after completing 4.0 credits (or the equivalent), and if the student would be in Good Standing if admitted. Students seeking admission are usually not considered for admission until the necessary prerequisites have been successfully completed in addition to the 4.0 approved credits (or the equivalent). The prerequisite subjects (4U/4M courses or equivalents) are found at the end of this section under Prerequisite Subjects.

If fewer than 4.0 credits have been completed, a Special student will be considered for admission after successful completion of:

- 2.0 full credits (or the equivalent) with a CGPA of 8.00 or higher, or
- 2.5 full credits (or the equivalent) with a CGPA of 7.00 or higher, or
- 3.0 full credits (or the equivalent) with a CGPA of 6.00 or higher, or
- 3.5 full credits (or the equivalent) with a CGPA of 5.00 or higher

Special students wishing to apply for admission to the

Faculty of Engineering, or the Schools of Architecture, Business, Computer Science, Industrial Design, Information Technology, Journalism, or Social Work, are urged to consult with Admissions Services.

Special students who meet the age requirement for Mature Applicants can normally be considered for admission on this basis only if they meet all admission requirements for Mature Applicants.

19. Previous Carleton Degree Students

All former students who have been formally admitted to a degree or certificate program at the undergraduate level and who are seeking readmission either to that program or to another program are governed by differing regulations, depending upon the faculty or school that offers the program.

Please refer to the relevant program section of this Calendar or, if there is no specific entry dealing with readmission in that section, consult the Registrar's Office to determine whether or not it is necessary to submit a new application for admission. Please note that previous Carleton students applying to limited enrolment programs must apply by the published deadlines. (See section 3 of *How to Apply*, below.)

20. Admission Procedures

How to Apply

Prospective students, when requesting an application directly from the University, should provide a complete outline of their academic background.

1. The following applicants may apply through the Ontario Universities' Application Centre (OUAC):
 - a) Current Ontario high school students should obtain a PIN number from their high school and apply online at www.ouac.on.ca. Alternatively, applicants can request a preprinted application form from their high school and arrange to have it submitted to the Application Centre.
 - b) All other applicants can apply online at www.ouac.on.ca. Alternatively, applicants can obtain a copy of the OUAC 105 application form designed for them by contacting the Application Centre at 170 Research Lane, Guelph, Ontario, Canada N1G 5E2.
 - c) Overseas applicants can also apply directly online at admissions.carleton.ca/ia
2. All applicants are required to reveal all previous secondary and post-secondary studies (whether they were successfully completed or not) when completing the application for admission.
3. Previous Carleton University students do not apply through the Application Centre unless they also wish to be considered for admission to another Ontario university. If they wish to apply solely to Carleton, applicants can apply directly online at: admissions.carleton.ca/applicant/cs. Applicants who wish to apply to another Ontario university as well as to Carleton should apply online at: www.ouac.on.ca
4. Students presently registered in a degree program at Carleton University applying for a transfer to another degree program do not apply through the Application Centre unless they also wish to be considered for admission to another Ontario university.

Please note: application is made through the Registrar's Office for permission to register in the following cases:

- a) students who wish to change to a different program within the same degree;
 - b) students who wish to add a Concentration, Specialization or Minor;
 - c) students who, after being admitted, must take intensive ESL before being allowed to register in their degree program; and
 - d) students who have been away from the University less than three consecutive fall/winter and intervening summer sessions and wish to register in the same degree.
5. The following categories of students are required to reapply for admission through Admissions Services:
- a) currently registered students who wish, or who are required, to change their degree;
 - b) students who have been suspended or debarred and wish to return to their program after the required absence from studies at Carleton;
 - c) students who, after completing their first undergraduate degree, wish to complete an additional undergraduate degree;
 - d) students who have left the University and wish to return to a different degree;
 - e) students who have left the University and, after attending another post-secondary institution (except on a letter of permission or exchange program), wish to return to Carleton University;
 - f) Special Students who wish to be formally admitted to a degree or certificate program at Carleton University; and
 - g) students who have been away from the University for three or more consecutive fall/winter sessions and intervening summer sessions.

21. Application Deadlines

The following are application dates for the 2008-2009 admission year:

February 1: Applicants to the Bachelor of Architectural Studies and the Bachelor of Social Work degree programs.

March 1: Applicants to the Bachelor of Humanities, Bachelor of Industrial Design, Bachelor of Information Technology (Interactive Multimedia and Design), Bachelor of Journalism and Bachelor of Music degree programs.

April 1: Applicants whose documents originate outside Canada or the United States.

May 1: Applicants to the B.A. Child Studies.

June 1: All applicants whose documents originate in Canada or the United States, except applicants to Child Studies, the School of Architecture, the College of the Humanities, the School of Industrial Design, the School of Journalism and Communication, Music, Information Technology (Interactive Multimedia and Design) or the School of Social Work.

June 15: Students registered in a degree program at Carleton University applying for a transfer to another degree program.

October 15: Applicants for January entry whose documents originate outside Canada or the United States.

November 15: Applicants for January entry whose documents originate in Canada or the United States.

Note: Applications for admission may be received after these dates, but the University cannot guarantee that all late applications will be processed in time for registration in the academic session requested. Applicants to programs with limited enrolment should note that such programs may be filled by this date.

22. Documents

Documents submitted in support of an application for admission become the property of the University. In some cases, original documents (for example, General Certificate of Education) may be returned to the applicant.

The University may nullify an admission and revoke a registration if it finds that an applicant for admission or registration has, in the process, provided false or incomplete information.

Applicants who are unable to submit documents of previous academic studies as a result of natural disaster, armed conflict, or the securing of refugee status are subject to the following policy:

1. Applicants who are unable to submit supporting documents will not be admitted. They will be encouraged to register as Special students and qualify for admission by taking courses at the University.
2. Applicants who can submit official transcripts but cannot submit course descriptions will be admitted to first year if:
 - i) their academic record meets the standards required by the program for which they are applying, and
 - ii) their high school studies include prerequisite subjects for admission to first year.
3. Applications from candidates who can provide course descriptions based on their recollection of the courses which they have taken will be treated according to the same procedures as those which apply to applicants who cannot submit course descriptions (see 2. above).

23. Early Admission

Offers of early admission will be based on the previous year final and current year interim marks.

For Ontario high school applicants, offers of admission will be made early February to end of May for the 2008 admissions cycle. The onus is on each student who does not receive an offer of early admission to supply official final marks to Admissions Services.

Out-of-province applicants will receive offers of admission as soon as interim marks are received by the University and the assessment is completed.

Applicants to a restricted enrolment program should note that their acceptance to an offer of admission must be received by Admissions Services within three weeks from the date on the offer of admission or by the date specified on the offer of admission.

Carleton reserves the right to withdraw offers of admission for failure to complete the school year satisfactorily or to meet the admission requirements and/or required averages or grades. In addition, applicants are advised that although they may receive an offer of admission based on interim marks, final marks, when they are received, will become part of the University's admission record.

24. Deferred Admission

How Do I Defer (Postpone) My Offer of Admission?

If an applicant is unable to attend Carleton University for the term specified on their Offer of Admission and wishes to postpone their studies they may ask for a deferred admission. A "Request to Defer Admission" form and a non-refundable fee of \$38.75 CAD must be received by Admissions Services within two weeks after the beginning of the term for which they have been admitted. A copy of the "Request to Defer Admission" form is available at: admissions.carleton.ca/applicant/defer/

Applicants whose deferrals have been approved will receive a new offer of admission for the appropriate term. The new offer will reflect any changes in their program requirements that may have occurred in the intervening time because of changes in programs and/or regulations. Final grades must be on file before a deferral can be confirmed.

Carleton University will not consider deferred admission for anyone admitted to a limited enrolment program or a program that requires additional materials such as portfolios or auditions in the decision-making process.

It is not possible to defer an offer of admission to Carleton University if the applicant is attending another post-secondary institution. Applicants who have been granted a deferred admission and who register at another post-secondary institution will have their admission withdrawn and will have to submit a new application for admission.

Please contact Admissions Services at 613-520-3609 for any additional information.

Admission Requirements

Undergraduate Degree Programs

Admission Requirements are for the 2008-2009 year only, and are based on the Ontario High School System. Holding the minimum admission requirements only establishes eligibility for consideration. General Information

The Enriched Support Program (ESP) is operated by the Centre for Initiatives in Education (CIE). The ESP is a program for students whose academic potential has not been realized in high school and who do not meet university admission requirements. The program gives these students the opportunity to prove their abilities within the context of university-level courses. ESP students attend three credits with regularly admitted students and are graded according to the same standards. ESP students also enrol in mandatory, content-related workshops designed to provide the academic support these students need to make the transition to university-level work. An Aboriginal Enriched Support Program (AESP) within the ESP offers personalized support to Aboriginal students.

All currently registered and prospective ESP students (see Student Classification, below) should contact the CIE for application and registration information.

Admission to the ESP

Students wishing to apply for admission to the ESP should contact the CIE. For details and an application form, visit: carleton.ca/cie/ESP/application.htm

ESP Student Classification

ESP students fall under the Special Student designation at Carleton University. Special students are those who have not been admitted to a degree program but who are taking degree-credit courses to qualify for admission.

ESP Students

Under the Special Student designation, ESP students enrol in the same courses and meet the same course requirements as students in degree programs. ESP students choose their credits from a specific selection of ESP supported courses.

Registrarial services for ESP students are provided by the Centre for Initiatives in Education and the Registrar's Office. ESP students are also encouraged to consult the appropriate Faculty regulations for information about degree programs they intend to apply for upon successful completion of the ESP.

Proficiency in English

Since the instructional language of the University is English, applicants to the ESP must be able to understand and be understood in English, both written

and oral. See section 4, English Language Requirements, in the General Admissions Requirements and Procedures for the statement of policy governing English language requirements for non-native speakers.

Course Load

Normally, ESP students may enrol in a maximum of 3.0 credits per academic session (fall/winter) and no more than the equivalent of 1.5 credits (e.g. three half-credit courses) in any one term. Course selection is limited to ESP-designated courses, many of which emphasize reading and writing skills. For two of these courses, students also attend regular weekly small-group workshops, where they are given extra support and guidance in dealing with the course material. The workshops are designed to develop the skills and strategies necessary for university-level critical thinking, analysis, reading and writing.

ESP-Supported Courses

ESP students wishing to be admitted eventually to a degree program are advised to note the specific Faculty requirements for course selection and the admission requirements as they are listed in this Calendar. Individuals seeking admission who need further information should inquire at the Admissions Services or the ESP Student Advisory Office.

Course Change and Course Withdrawal

Please consult the *Academic Regulations of the University* section of this Calendar.

Deferred Final Examinations

Please consult the *Academic Regulations of the University* section of this Calendar.

Financial Assistance

ESP students interested in obtaining financial assistance are advised to contact the Student Awards Office at 613-520-3600.

Admission to a Degree Program upon Completion of ESP

ESP students are subject to the same admission requirements as Special Students. These requirements are outlined in the Admissions Requirements section of this Calendar. Normally, ESP students who have successfully completed all 3.0 credits of their program with a C+ average (CGPA of 6.0 or better) can be considered for admission to a three-year degree program in the Faculty of Arts and Social Sciences or the Faculty of Public Affairs and Management. ESP students wishing to apply for admission to the Faculty of Engineering or the Schools of Architecture, Business, Computer Science, Industrial Design, Journalism, or Social Work are urged to consult with Admissions Services or the Centre for Initiatives in Education.

A. Registration, Evaluation and Records

1.0 Course Registration

1.1 Permission to Register

To be eligible to register for an academic term, students must meet the following requirements:

- a) Students new to Carleton must be formally admitted to a degree or certificate program OR have submitted the required application for Special student studies;
- b) Returning students must be academically eligible to continue in their programs;
- c) There must be no outstanding account with the university;
- d) The student must not have been suspended from the university for disciplinary reasons;
- e) **International students must be enrolled in or have received permission for exemption from the University Health Insurance Plan (UHIP).**

Registration instructions for the fall and winter terms are mailed to newly admitted and returning students. Information regarding summer term is available from the Registrar's Office normally by February 1 (carleton.ca/summer). Information about registration is also available at carleton.ca/registration.

1.2 Course Selection and Registration

Course selection must be completed according to the requirements of the faculty or school and major department(s) in which the student is registering. Students should seek the advice of their program adviser, academic unit or the Student Academic Success Centre when making course selections.

Students planning to undertake professional training beyond their undergraduate studies should ensure that their undergraduate programs meet the requirements for admission to, or registration in, their intended post-graduate program.

Acceptance by the University of a course registration does not exempt the student from any academic regulations.

All course selection and course change activity (adds, drops, withdrawals, change of section) is normally completed using Carleton Central at central.carleton.ca. These activities are limited by deadlines set out in the Academic Year section of this Calendar. It is the student's responsibility to understand and meet these deadlines.

1.3 Payment of Fees

A student is responsible for all tuition and other fees resulting from registration in any and all courses. The student remains responsible for paying this debt whether or not the student attends or participates in the class or classes.

Student Accounts may be viewed through Carleton Central and are the administrative responsibility of the Business Office.

1.4 Withdrawal

Responsibility for taking all steps necessary for withdrawal from an individual course, from several courses, or from all courses resides with the student. Ceasing to attend classes, or informing an instructor of intent to withdraw does not constitute withdrawal. Withdrawal is normally completed by using Carleton Central at central.carleton.ca. The official date of withdrawal from the course(s) is the date on which the student successfully completes the necessary withdrawal action.

Students must withdraw from courses on or before the appropriate last date for withdrawal as indicated in the Academic Year section of this Calendar. It is not possible to withdraw from a course or courses or from the University after the appropriate designated last date for withdrawal.

Withdrawal activity may affect academic standing as prescribed by regulations governing the program. Consult the Registrar's Office for information and guidance. A student who withdraws from a course retains no academic credit for any part of that course. Withdrawing from a course may have serious consequences for scholarships, OSAP and other student financial support programs. Students are advised to consult the Awards Office for guidance.

Fee adjustments for students who are withdrawing from a course, courses, or entirely from the University will be calculated as of the date of successful completion of withdrawal via Carleton Central.

1.5 Deregistration

The University may cancel a registration under the following circumstances:

- a) if it is determined that the student does not meet all of the requirements for permission to register as set out in 1.1 above;
- b) if it is determined that an applicant for admission has, in the process, provided false or incomplete information;
- c) if the student does not have, or present proof of when requested, the course prerequisite(s);
- d) if fee payment arrangements for a term are not completed according to registration requirements;
- e) if it is determined that the student has not met the additional admission requirements including ESL or CAEL or other English language proficiency requirements;
- f) if it is determined that the student has not met the requirements of a conditional offer of admission.

1.6 Auditing Courses

Students may register to audit courses (i.e. attend without receiving credit) in addition to those courses being taken for credit. Although audited courses receive no academic credit, they are counted as part of the total course load for both academic and fee assessment purposes. Registration to audit requires the permission of the instructor. Access to courses for purposes of auditing is also limited by demand for credit space in courses. Some courses are not available for audit purposes. The deadline to change a course enrolment from credit to audit or audit to credit is the last day for course changes (see the Academic Year section of this Calendar).

The Course Outline (see Section 2.2) may specify conditions, such as attendance, that must be satisfied for successful audit. If these conditions are met the notation Audit (AUD) is given; if the conditions are not met the notation Did Not Complete (DNC) is assigned.

1.7 Credit for Closely-Related Courses

The university recognizes three distinct close relationships between courses.

Courses *preclude* credit for each other if they contain sufficient content in common that credit may not be earned for more than one of the courses. Should two or more courses be taken that preclude each other, only the latter attempt will be available for program credit; the remaining earlier attempt(s) will be forfeited. Courses that preclude each other are not necessarily considered equivalent and may or may not be interchangeable in fulfilling degree requirements.

Courses are *equivalent* if the appropriate academic unit(s) consider the content of the courses to be sufficiently similar that either course may be used to fulfil a program requirement. Courses designated as equivalent to each other preclude credit for each other: credit may be retained only for one of the attempts; the remaining attempt(s) will be forfeited. Examples of equivalent courses arise frequently in Advanced Standing and when new curriculum is introduced.

Two courses are *cross-listed* if they are the same course listed under two different subject codes, usually by two different academic units.

In all cases, credit will be given for only one of the courses in any equivalent, precluded or cross-listed pair. Students planning to enrol in such courses are advised to consult with their academic adviser in advance of registration to ensure that the course number under which they will be enrolling is appropriate to their program. Changes to resolve incorrect course selection due to equivalence, preclusion or cross-listing may not be made after the last day for course changes in the term (see the Academic Year section of this Calendar).

1.8 Two-term Courses

Certain courses may be taught over two academic terms. Students are required to register in such courses twice, once in each term. The student must register in the same section in each term. These courses will be clearly identified in the registration material.

The most common example is a 1.0-credit course taught over the fall and winter terms.

In place of a grade, the first term course will be assigned the notation *CTN*. The second term course will be assigned the final grade for the entire course. Credit will be given only for the complete course taught over two consecutive terms in corresponding sections. No credit will be given for part of the course.

1.9 Challenge for Credit

Challenge for credit is a Carleton University policy that enables students to gain undergraduate academic credit for their own learning and experience through work and related professional development. It is not intended to overlap in scope with transfer of credits or admission with advanced standing.

This policy gives the student the opportunity to be examined on, and receive credit for, a recognized Carleton course without meeting the normal requirements of registration, attendance, and instruction. Students wishing to *challenge for credit* should inquire at The Registrar's Office and provide documentation to support the challenge. If the academic department, after an interview, is satisfied that the student has adequate experience and learning related to the course in question, it sets an appropriate examination. If the student is successful in the examination, the course is credited to his or her academic record.

Not all courses offered at the University are open to challenge for credit. Students seeking more information should contact the Registrar's Office.

Challenge for credit is available only to students formally admitted to and registered in a program leading to a Degree or Certificate. Special students are not eligible to apply for Challenge of Credit. Students may *challenge for credit* in a course only if they are in *Good Standing* academically. A student may not *challenge for credit* more than once in the same course.

Credits obtained by challenge may not be used to satisfy the residency requirement for the student's degree program or major discipline (see Section 5.2).

1.10 Academic Petitions and Appeals

A petition is the initial request by a student for an accommodation with respect to a regulation. An appeal is a process by which a student may challenge the decision on a petition.

The procedures set out here are concerned with academic regulations and admission decisions. There is a separate review and appeal process for reconsideration of grades in term work and final examinations (see Sections 2.7 and 2.8). Concerns related to the offering of a particular course are within the jurisdiction of the Dean of the faculty offering the course.

A student seeking an accommodation with respect to an academic regulation submits a petition in writing to the Registrar's Office. A student seeking a reconsideration of an admission decision submits an application in writing to the Admissions Services Office.

Students not satisfied with a decision at the petition stage may initiate an appeal in writing, at the Registrar's Office or the Admissions Services Office.

2.0 Course Evaluation

2.1 Credit

To obtain credit in a course, students must meet all the course requirements for attendance, term work and examinations as published in the course outline.

2.2 The Course Outline

The instructor is required to provide to the students of each course a formal statement called the course outline. The course outline must be given to the students before the last date for course changes, in a document distributed in class or posted at the class Web site.

The course outline must specify all the elements that will contribute to the final grade, and the weighting of each element.

The course outline may specify requirements that must be satisfied for the student to be eligible to write the final examination or the deferral of the final examination. If no such conditions are explicitly mentioned in the course outline, all students are eligible to write the final examination or, where circumstances warrant, to apply to the Registrar's Office for deferral of the final examination.

The course outline may also specify the requirements imposed on those auditing a course, including attendance, to successfully complete the audit.

2.2.1 Early Feedback Guideline

Providing feedback to students on academic work, completed or in progress, is an integral part of teaching and learning in that it allows students to measure their understanding of material, the success of their learning strategies, and their progress on learning objectives. While the nature and frequency of such feedback will vary with the course and level, Carleton University is committed to providing students with appropriate and timely feedback on their work. Accordingly, wherever possible, and especially in first and second year courses, instructors are urged to include academic work that is assigned, evaluated and returned prior to the 25th teaching day of each term. More generally, all instructors are urged to include academic work that is assigned, evaluated and returned prior to the 40th teaching day of each term.

The spirit of this guideline should be followed during the summer term. In particular, all instructors are urged to include academic work that is assigned, evaluated, and returned at least two days prior to the last day to withdraw from the course in Early Late, or Full Summer term.

2.3 Standing in Courses/Grading System

Course outlines should provide an indication of approximately when the first graded piece of work will be returned to students. In cases where a course does not lend itself to early feedback, this should be clearly noted on the course outline.

Standing in a course is determined by the course instructor, subject to the approval of the faculty Dean. Standing in courses will be shown by alphabetical grades. The system of grades used, with corresponding grade points is:

A+	12	B+	9
A	11	B	8
A-	10	B-	7
C+	6	D+	3
C	5	D	2
C-	4	D-	1
		F	0

Grade points indicated above are for courses with 1.0 credit value. Where the course credit is greater or less than one credit, the grade points are adjusted proportionately.

The following percentage equivalents apply to all final grades at Carleton:

A+	90-100	B+	77-79
A	85-89	B	73-76
A-	80-84	B-	70-72
C+	67-69	D+	57-59
C	63-66	D	53-56
C-	60-62	D-	50-52
		F	0-49

Other grades and notations in current use by the University are as follows:

- F** Failure. The grade of *F* is assigned when the student has failed to meet the conditions of "satisfactory performance" defined in the Course Outline. The grade of *F* is assigned 0.0 grade points.
- FND** Failure with no deferred final examination allowed. The grade *FND* is assigned only when the student has failed the course on the basis of inadequate term work as specified in the Course Outline. The grade *FND* is assigned 0.0 grade points.
- ABS** Absent from a required final examination. The notation *Abs* is assigned only when the student is absent from the required final examination and has achieved satisfactory performance during the term as specified in the Course Outline. *Abs* is equivalent to an *F* and is assigned 0.0 grade points.
- AEG** *Aegrotat*. Pass standing is granted under special circumstances by an academic appeal committee, in response to an application from or on behalf of a student, on the basis of

course work when no further assessment is considered feasible. *Aeg* has no impact on the CGPA calculation.

AUD Audit. No academic credit. Indicates the course was not taken for academic credit, but that the student has the permission of the instructor to audit the course and has satisfied the conditions for successful audit of the course. *Aud* has no impact on the CGPA calculation.

DNC Did not complete the course. No academic credit or impact on the CGPA calculation.

In credit courses, the notation *DNC* is assigned by the appropriate appeal committee in the case of a student, who, having achieved satisfactory performance during the term, and has been granted a deferred final examination in the course then is unable to write the deferred examination due to continued and documented personal or medical reasons.

In the case of audited courses, the notation *DNC* is assigned by the instructor when the student has registered to audit the course and has not satisfied the requirements for successful audit.

CTN Continuing. This notation is assigned by the Registrar's Office only to the first half of a course taught as consecutive sections over two terms.

WDN Withdrawn. No academic credit. *Wdn* has no impact on the CGPA calculation.

CH Credit granted under challenge for credit policy. *Ch* has no impact on the CGPA calculation.

SAT Satisfactory performance in an ungraded program requirement or option. *Sat* has no impact on the CGPA calculation.

UNS Unsatisfactory performance in an ungraded program requirement or option. *Uns* has no impact on the CGPA calculation.

CUR Current registration. This interim notation is assigned only by the Registrar's Office, and indicates that the student is currently registered in this course.

GNA Grade not available. This interim notation is assigned only by the Registrar's Office, and indicates that the grade for this course is not available. This notation is replaced with the appropriate grade for the course as soon as this is available.

The following are interim notations that are, after due process, replaced with one of the grades above.

DEF Final grade deferred for documented personal or medical conditions. *Def* is an interim notation assigned by the Registrar's Office. This notation must be replaced by a grade within the prescribed time or it is replaced with an *F*. (See 2.5, Deferred Final Examinations.)

IP In Progress. This interim notation is assigned only with the permission of the Registrar's Office when the final grade in a research thesis or project is not available before the deadline for grade submission. This notation must be replaced by a grade within the prescribed time or re-registration in the course will be required, or the *IP* is replaced with an *F*.

The following notations are no longer in use by the University:

FNS Failure without access to a supplemental examination because of incomplete term work or unacceptably low standing. No academic credit.

FWS Failure with access to supplemental examinations.

2.3.1 A course is considered to be *completed* when the course registration results in a notation or grade other than *WDN*, *DNC*, *IP*, *CTN* or *AUD*.

2.3.2 A course is considered to be *successfully completed* if the course is completed with a passing grade, *SAT*, *CH*, or *AEG*.

2.4 Examination Regulations

Students writing tests and examinations should be aware of the rules governing examination conduct. These rules include those listed in the Academic Integrity section of this Calendar as well as those printed on the back cover of official examination booklets. Students may inform themselves of these latter rules at www.carleton.ca/cu/programs/exam/ and section 14.0 below in these Academic Regulations of the University.

For those examinations scheduled during the official examination period, it may be necessary to schedule examinations during the day for classes held in the evening and vice versa or on Saturday.

All tests and examinations, except laboratory examinations, oral and slide tests and other particular tests, are subject to the following rules:

- a) Tests or examinations given in class may not exceed the time allotted for the class;
- b) Final examinations in the summer term will be held in official examination periods;
- c) In courses numbered below the 2000-level, if there is a final examination or an end of term examination in a multi-term course, this examination will be held in the official examination periods;
- d) In courses numbered below the 4000-level, no tests or examinations may be held during the last two weeks of fall, winter or summer terms, or between the end of classes in a term and the beginning of formally scheduled examinations;
- e) In courses below the 4000-level, take-home examinations may not be assigned before the last day of classes and are due on the last day of the official examination period;
- f) In courses at the 4000-level, arrangements for examinations outside the official examination period are at the instructor's discretion but must be announced at least three weeks in advance.

2.5 Deferred Final Examinations

Students who are unable to write or complete a final examination because of illness or other circumstances beyond their control may apply to write a deferred examination. Students who

have completed a final examination but find that their performance was severely impaired by illness or other circumstances beyond their control may petition for special permission to write a deferred examination. In both cases the application must:

- a) be made in writing to the Registrar's Office no later than five working days after the original final examination or the due date of the take-home examination; and
- b) be fully supported in cases of illness by a medical certificate dated no later than one working day after the examination or by appropriate documents in other cases. Medical documents must specify the date of the onset of the illness, the (expected) date of recovery, and the extent to which the student was/is incapacitated during the time of the examination.

The granting of a deferral also requires that the student has performed satisfactorily in the course according to the evaluation scheme established in the Course Outline, excluding the final examination for which deferral privileges are requested. Reasons for denial of a deferral may include, among other conditions, a failure to (i) achieve a minimum score in the course before the final examination; (ii) attend a minimum number of classes; (iii) successfully complete a specific task (e.g. term paper, critical report, group project, computer or other assignment); (iv) complete laboratory work; (v) successfully complete one or more midterms; or (vi) meet other reasonable conditions of successful performance.

Aegrotat standing may be considered for applicants for deferred finals but will be granted only if a substantial proportion of the term work has been completed and is of high quality.

Students will not be given a deferral of a deferred examination. Students granted a deferred final examination who are then unable to write the deferred final examination due to properly documented personal or medical conditions will receive one of the notations *Aegrotat* (*Aeg*), Did Not Complete (DNC) or the grade F for the course as assigned by the appropriate appeal committee. The notation *Aeg* denotes a pass standing and is assigned only in cases where a substantial proportion of the term work has been completed and is at a high academic standard. The notation DNC denotes that the course has been neither passed nor failed and is assigned when satisfactory performance has been achieved during the term. In all other cases, the grade F is assigned. (see **Standing in Courses, Section 2.3**).

Students who have obtained approval for a deferred examination in a CUTV course will not have access to tapes for the course after the end of the academic term of the original course.

Deferred final examinations are scheduled in the time period approved by Senate, unless alternate arrangements are made with the instructor. Except for the special cases described below, deferred final examinations are held in February for fall term courses, in June for fall/winter and winter term courses and in October for summer term courses, except where such a delay will delay graduation.

The deferred examination schedule is altered for certain mathematics, physics and statistics courses:

MATH 0007, MATH 0107, MATH 1005, MATH 1007, MATH 1107, MATH 1009, MATH 1119, MATH 2004, MATH 2007, MATH 2008, MATH 2107, PHYS 1001, PHYS 1002, PHYS 1007, PHYS 1008, STAT 2507, STAT 2509, STAT 2605

For these courses, when the course is offered again the next term, the deferred final examinations are held in April for fall term courses, in December for summer term courses and, with the other deferred examinations, in June for winter term courses.

2.6 Deferred Term Work

In some situations, students are unable to complete a significant term assignment because of illness or other circumstances beyond their control, which forces them to delay submission of the work. If this happens late in the term, it may be necessary for the due date to be delayed beyond the deadline for reporting the course grades. The student should, in the first instance, consult with the course instructor. If a student is unable to submit an essential piece of term work in time for the determination of the final grade, the student may apply for a deferral of the assignment deadline. The application for deferred assignment must:

- a) be made in writing to the Registrar's Office no later than five working days after the last day of classes; and
- b) be fully supported in cases of illness by a medical certificate or by appropriate documents in other cases. Medical documents must specify the date seen, date of the onset of the illness, the (expected) date of recovery, and the extent to which the student was/is incapacitated during the time the assignment was to be prepared.

If the deferral of the assignment is approved, the student will receive the interim notation *Def*, which will be replaced when the assignment has been submitted and graded. The final dates for submission of deferred term assignments are the following, unless alternate arrangements are made with the instructor:

Fall-term courses: February 1

Fall/winter- and winter-term courses: June 1

Summer-term courses ending in June: August 1

Summer term courses ending in August: September 15

2.7 Review of Grades

Whenever possible, both during the term and after, concerns about the grading of student work should be settled informally between the student and the instructor. The protocols described here are the procedures to follow when this informal process cannot be followed. The outcome of a review may raise, lower or leave unchanged the original grade.

2.7.1 Definitions

Term work consists of any assigned course work that is returned to the student on or before the date when the term ends as stated in the official schedule of the University, provided in the Academic Year section of this Calendar. This date often differs from the last day of classes.

Final work is any assessed work received back later than this date. Final work includes, but is not limited to, final examinations.

2.7.2 Review of Grade for Term Work

A request for Review of Grade for Term Work is made to the instructor assigned to the course and the request can apply to any or all assignments, tests and other evaluations. The request must be made within 14 days of the day the grade is available to the student.

2.7.3 Review of Grade for Final Work

Students may request a Review of Grade for Final Work at the Registrar's Office. The course instructor conducts the Review of Grade for Final Work, or, if the instructor is not available, an alternate qualified reader designated by the Chair or Director. Check The Academic Year section of this Calendar for the application deadlines.

2.8 Appeal of a Grade

If the process of Review of Grade for Term Work or Final Work has not resolved the concerns, or if Review is not appropriate, and where reasonable grounds exist which suggest error in the grade assigned by an instructor, then an appeal of the grade may be made to the Dean of the faculty offering the course. The appeal is specific to the grade on a given piece of work, and more than one such grade may be appealed.

The Dean, designated Chair, or Director will, when reasonable grounds exist, assign assessment of the written or equivalent course work to at least one qualified reader other than the instructor. After due consultation, the Dean, as chief academic officer of the faculty, will assign the grade. The outcome of the Appeal may raise, lower or leave unchanged the original grade.

The Appeal must be submitted to the Registrar's Office with full supporting documentation within 14 days of the completion of the Review, or, if there was no Review, within 14 days of receipt of the original grade.

2.9 Academic Accommodation for Students with Disabilities

Carleton University is strongly committed to providing access and accommodation for all individuals with identified and duly assessed disabilities. The University has a Senate-approved policy on Academic Accommodation that forms part of its Human Rights Policy. This policy should be consulted for further information and is available at the front of this Calendar and online at: carleton.ca/equity. The policy promotes efforts to accommodate students with disabilities so that they will have the opportunity to meet learning objectives and be fairly evaluated in their performance. In no case, however, does academic accommodation

negotiate away, lower, or remove the academic standards and learning objectives of any course or program, rule, regulation, or policy at the University.

The Paul Menton Centre for Students with Disabilities is the designated unit at the University for assisting the Carleton community in integrating persons with disabilities into all aspects of Carleton's academic and community life. The Paul Menton Centre provides assessment of academic accommodation, advises students on strategies to open a dialogue with instructors and acts as consultant, facilitator, coordinator and advocate in this area for all members of the University community.

The Paul Menton Centre provides individualized support services, based on appropriate and up to date documentation, to persons who are deaf or hard of hearing, with learning disabilities, attention deficit disorder (ADD), visual impairments, head injuries, physical disabilities including mobility impairments, or who have psychiatric, other medical or non-visible disabilities.

Students are responsible for applying for special services by making an appointment with the appropriate coordinator at the Paul Menton Centre. All requests will be considered on the basis of individual need. Students are advised to come to the Centre early in the term to discuss service requests.

Examination accommodations for all tests and examinations (in-class, CUTV, or formally scheduled) must be arranged by specific deadline dates. Please consult the Paul Menton Centre for a list of deadlines for all examinations. Accommodation requests not made prior to the specified deadlines will not be fulfilled.

2.10 Academic Accommodation for Students with Religious Obligations

Carleton University accommodates students who, due to religious obligation, must miss an examination, test, assignment deadline, laboratory, or other compulsory event. The University has a Senate-approved policy on religious accommodation that forms part of its Human Rights Policy, available at: carleton.ca/equity.

Accommodation will be worked out directly and on an individual basis between the student and the instructor(s) involved. Students should make a formal written request to the instructor(s) for alternative dates and/or means of satisfying requirements. Such requests should be made during the first two weeks of any given academic term*, or as soon as possible after a need for accommodation is known to exist, but in no case later than the penultimate week of classes in that term. Instructors will make reasonable accommodation in a way that shall avoid academic disadvantage to the student.

Students unable to reach a satisfactory arrangement with their instructor(s) should contact the Director of Equity Services. Instructors who have questions or wish to verify the nature of the religious event or practice involved should also contact this officer.

*When a student's presence is required prior to the date on which classes begin (e.g. for field

trips or orientation activities), any student who cannot meet this expectation of attendance for reasons of religious accommodation should notify the Registrar's Office in advance.

3.0 Records and Communication

3.1 Student Record Information

3.1.1 Names

As the University is committed to the integrity of its student records, students are required to provide either on application for admission or on personal data forms required for registration, their complete, legal name. Any requests to change a name, by means of alteration, deletion, substitution or addition, must be accompanied by appropriate supporting documentation. Upon making application for graduation, students may be asked to provide proof of their name.

3.1.2 Addresses

Students are responsible for keeping their address and phone number information current. Address and phone number changes are done via Carleton Central. Incorrect address information will delay the receipt of important academic information.

3.2 Records Retention Policy

The University's records retention policy provides for the destruction of physical student file folders and their contents after five years has elapsed since the last registration. Carleton University student academic history information is retained electronically in perpetuity. This policy applies to all students who are formally admitted and registered at the University. Students who go through the Admissions process but do not accept our Offer of Admission will have their files destroyed at the end of the Admissions cycle. Further information on the policy can be obtained by contacting the Registrar's Office.

3.3 Disclosure of Information

The Ministry of Colleges and Universities and Statistics Canada require that Carleton University provide to them information pertaining to a student's status and other personal information. Upon registration as a student, one is deemed to have agreed to the disclosure by Carleton University of the student's status and other selected personal information pursuant to any such requirement.

In accordance with the Freedom of Information and Protection of Privacy Act (FIPPA), all personal and academic information is considered confidential and will not be disclosed to a third party without the authorization of the person to whom the information pertains. In addition, the University will disclose at the time of collection of personal information the purpose for which that information will be used. For further information, please see fippa.carleton.ca

3.4 Student Status

When responding to a legitimate request from an external agency, the following definitions are used:

- a) a *full-time undergraduate student* is one who is registered in at least 1.5 credits per term.
- b) a *full course load* is the normal maximum course load as defined by the student's program and evaluated term by term.

3.5 Electronic Communication

The University uses electronic mail communication through its MyCarleton (Connect) system as an official channel of communication with students. A message sent to a student's MyCarleton email account constitutes an official communication with the student. Students are responsible for monitoring their University email account on a regular basis for as long as they are active in the academic affairs of the University. Requests from students regarding academic or administrative issues must be sent from the student's MyCarleton account.

B. Academic Regulations for Degree Students

4.0 General Regulations and Definitions

4.1 The Comprehensive Regulations

4.1.1 The Senate of Carleton University may at any time require a student to withdraw from the University if his or her conduct, attendance, work or progress is deemed unsatisfactory.

4.1.2 Acceptance by the University of a registration does not exempt the student from any academic regulation.

4.2 Regulations Governing a Student's Program

Curriculum and regulations are subject to change as the University updates and improves its undergraduate program. These changes may include alterations to course offerings, program requirements and academic regulations. In establishing transition policies that determine how these changes will impact in-program students, the University is guided by the intent that students retain the same or improved overall opportunities to succeed.

The following policies are in effect:

4.2.1 A degree student who has been admitted to a program continues, in subsequent years, to be governed by the regulations in the Undergraduate Calendar of the year of admission. An exception is made for the requirements for a Minor, which may be taken from a subsequent Calendar. A Degree Audit report illustrating the requirements is available through Carleton Central.

4.2.2 If, in subsequent years, the student is readmitted to or reinstated in the same program or another program for any reason, the student will be governed by the regulations of the Undergraduate Calendar of the year of readmission or reinstatement. An exception is made for the requirements for a Minor, which may be taken from a subsequent Calendar.

4.2.3 As changes are made, students may choose to complete their studies under new regulations that are introduced in subsequent years, provided they meet the requirements of these regulations. In such cases, students will be governed by both the regulations and program requirements of a single Undergraduate Calendar, dated the year of, or subsequent to, admission or readmission. An exception is made for the requirements for a Minor, which may be taken from a different, single Calendar.

4.2.4 Notwithstanding 4.2.1, when circumstances prevent continued application of regulations, program requirements or courses of a previous Calendar, appropriate replacement policies guiding students in adapting to the new situation will be developed and communicated to students.

4.2.5 The web version of the Calendar is the official version. Changes approved after the print date will be posted on the Calendar website.

4.3 Absence from the University

Degree students who have been away from the university for more than nine consecutive terms must apply for readmission through Admission Services.

4.4 Student Categories

The undergraduate students of the University are grouped in four broad categories: Degree Students, Certificate Students, Special Students, and Non-credit Students.

Within the Degree Students category, a further subdivision is defined as Degree Students Admitted with Additional Requirements. This subdivision includes:

- students admitted with a deficiency
- students readmitted with conditions
- credit ESL students

Students admitted with Additional Requirements who fail to meet these condition may not continue at the University for a period of one year and must then apply for re-admission if they wish to return.

The category of Certificate Students includes all students registered in the certificate and diploma programs identified in 1.0 Certificates and Diplomas. Those registered in other non-credit professional or development certificates offered by the university are not included. A student may be simultaneously both a Degree Student and a Certificate Student.

4.5 Types of Programs

The undergraduate programs of the university are divided into three categories.

Honours Programs

Honours programs require 20.0 credits (and in a few cases more than 20.0 credits). With full time study and a normal course load, Honours programs are completed in four years. The Honours programs demand a higher academic standard than general programs.

General Programs

General programs require 15.0 credits. With full time study and a normal course load, General programs are completed in three years. Four exceptional General programs (Computer Science, Information Technology, Earth Sciences, Physics and Biochemistry) require 20.0 credits and normally require four years for completion.

Engineering and Design programs

These accredited programs offered by the Faculty of Engineering and Design are in Engineering, in Industrial Design and in Architecture. These programs require at least 20.0 credits and with a normal course load and full time study require four years for completion.

All of the above programs may include additional elements.

4.6 Program Structure

Program Elements

The courses that make up a program are separated into certain standard categories that give the program its structure, allow effective assessment of the student's progress and permit the inclusion of additional notations on the transcript and diploma.

In most programs certain course credits are identified as constituting the Major. The Major specifies the required course credits in one or more defined disciplines, themes, or fields that are the principal focus of a student's program. The Academic Performance Evaluation described below makes use of this distinction by calculating a Major average as well as an Overall average. A Combined Honours program may be structured with two Majors, one in each contributing discipline or, in some cases, as a single Major. A multidisciplinary program is structured as a single Major drawing together courses from several disciplines.

Some programs specify a limited set of credits that constitute a Core. These are courses of special importance to the program and are subject to specific CGPA requirements.

A Concentration or Specialization is a defined set of courses which provides a student with specific expertise, knowledge and/or practice and so further distinguishes the program in a recognizable way. The credits in the concentration or specialization may or may not be part of the Major. Successful completion of a concentration or specialization is recorded on the diploma.

A Stream is a pattern of courses within the program that guides the student's studies and is distinctive from other patterns, but does not result in a designation on the diploma.

Additions to a Program

An Option is an addition to a program, the pursuit of which does not affect eligibility for the degree without the Option. Registration in the Option does not change the degree requirements. An example is the Co-operative Education Option.

Other additions to a program that do interact with program requirements include: *Mention : français* (see the Academic Regulations and Requirements for the Bachelor of Arts), concurrent certificates and concurrent diplomas.

Minors

A Minor is a defined set of courses in a discipline or field that either introduces or extends knowledge of that discipline or field. A Minor may have its own admission requirements. Minors are only available to students already registered as Carleton degree students. Each Minor requires at least 4.0 and at most 5.0 credits. In some circumstances, credits in excess of those required for the main degree may be required to complete the Minor. A maximum of two credits may count toward both the Minor and the Major or Majors of a student's program.

4.7 University Year Standing

Students in degree programs are given a Year Standing according to the number of credits completed with passing grades and counting towards the degree. The categories are as follows:

First Year:

Fewer than 4.0 credits completed successfully and counting towards the degree.

Second Year:

4.0 through 8.5 credits completed successfully and counting towards the degree.

Third Year:

9.0 through 13.5 credits completed successfully and counting towards the degree.

Fourth Year:

14.0 or more credits completed successfully and counting towards the degree and in a program requiring more than 15.0 credits.

Programs in the Faculty of Engineering and Design identify specific courses that must be completed for a particular year status in that program, which does not necessarily conform to the above formula. Refer to the Engineering and Design section of this Calendar for details.

Year standing assessment occurs at the end of each term, once all final grades are received; January, June, August and October.

4.8 Undeclared Students

Degree students are considered "Undeclared" if they have been admitted to the degree but are not yet accepted into a program within that degree. The status "Undeclared" is available only in the B.A. and B.Sc. degrees. See the Undeclared section in the Programs section of this Calendar for recommended registration information. Normally, Undeclared students are required to be eligible to enter a program within their degree before reaching second year standing. Undeclared students with second year standing (see section 4.7 above) will not be allowed to register in courses. Undeclared students should consult the Student Academic Success Centre for guidance in planning their studies.

4.9 Changes of Degree and Program

4.9.1 Application through Registrar's Office

Application is made through Carleton Central (Change of Program Element application) for admission, re-admission or re-instatement and permission to register in the following cases:

- a) students who wish to change to a different program or change program elements within the same degree;
- b) students who wish to add a Concentration, Specialization or Minor;
- c) students who, after being admitted, must take intensive ESL before being allowed to register in their degree program.
- d) students who have been away from the University for fewer than nine consecutive terms and wish to register in the same degree.

4.9.2 Application through Career Development and Cooperative Education Office

Application is made through the Career Development and Cooperative Education Office for admission to the Co-op Option.

4.9.3 Application through Admissions Services

The following categories of students are required to reapply for admission through Admissions Services:

- a) currently registered students who wish, or who are required, to change their degree;
- b) students who have been suspended or debarred and wish to return to their original program after the required absence from studies at Carleton University;
- c) students who, after completing an undergraduate degree, wish to complete an additional undergraduate degree;
- d) students who have left the University and wish to return to a different degree;
- e) students who have left the University and, after attending another post-secondary institution (except on a letter of permission or exchange program), wish to return to Carleton University;
- f) Special Students who wish to be formally admitted to a degree or certificate program at Carleton University; and
- g) students who have been away from the University for nine or more consecutive terms.

4.10 Types of Courses**4.10.1 Course Categories**

The requirements for a degree or program may include specific named categories of courses. These categories are defined either in the main degree section of the calendar or within the program description. In addition most degrees prohibit credit for some particular set of courses. Such courses can not be used even as "free electives." Students should refer to the regulations and course categories for their degree for details.

4.10.2 Courses Set Aside

Three categories of courses that do not contribute to the fulfilment of graduation requirements may appear on a student's degree audit report:

Extra to the Degree (ETD)

Passed credits that could have counted towards the degree but are in excess of the credits required for graduation are *Extra to Degree*. These credits may be considered for advanced standing in a subsequent degree. This category includes, for example, passed credits at the 1000-level in excess of the 7.0-credit limit.

No Credit for Degree (NCD)

Passed credits that are ineligible for credit in the student's program are *No Credit for Degree*. These credits may be considered for advanced standing in a subsequent degree. This category includes, for example, courses specifically prohibited from credit in a particular degree.

Forfeit

Courses that cannot be used for credit in this or any subsequent program. This category includes:

- a) repeated courses;
- b) failed courses replaced in the program requirements by a different course;
- c) courses considered equivalent to courses used to fulfil program requirements;
- d) courses precluded for credit by courses used to fulfil degree requirements;
- e) courses placed in this category by an academic standing decision.
- f) courses placed in this category by an appeal committee.

5.0 Admission and Residency Regulations

5.1 Transfer of Credit Prior to Admission

When a student is considered for admission, credit may be granted for individual courses successfully completed at other recognized, degree-granting institutions, if:

- a) the individual courses are relevant to a student's proposed program; and
- b) the appropriate academic department recommends such action.

Each application is evaluated on its own merits.

5.2 Transfer of Credit Subsequent to Admission**Letter of Permission**

Students who have been formally admitted to a degree or certificate program may take courses at other universities on Letters of Permission, and have the credits transferred to their Carleton programs. The following conditions must be met:

- a) the student must have completed successfully at least 4.0 credits at Carleton University;
- b) the student must meet the minimum CGPA requirements for graduation in his or her degree;
- c) the student must obtain formal approval from the Registrar's Office prior to commencing each course.

Grades for successfully completed courses taken on Letters of Permission and Exchange (not including the University of Ottawa Exchange) will not be transferred. A course taken on Letter of Permission and failed is counted as a discredit and is recorded with the grade *Uns* (Unsatisfactory). A higher level of performance may be required in a course that would have contributed to any programmatic CGPA had the grade been transferred. Such a course with a passing grade below the minimum required will not count towards the degree, but will be counted as discredit.

University of Ottawa Exchange Agreement

Degree Students may register to take courses at the University of Ottawa to be credited to their Carleton University degree. The following regulations apply:

- a) Students must be registered in a degree program and must be in *Good Standing*. In the case of first-year studies, a maximum of two half-credit courses may be taken at the University of Ottawa that year.
- b) Only courses to be credited as part of the current degree requirements at Carleton may be taken under the terms of the exchange.
- c) At any registration, the cumulative total number of credits taken at Carleton and counting towards the degree must be greater than the total number of credits taken and/or proposed to be taken at the University of Ottawa.
- d) Courses taken under the Exchange Agreement shall not count as courses taken at Carleton under regulations requiring a minimum number of Carleton credits.
- e) Grades for courses taken on the Exchange Agreement will be reported on the Carleton transcript and will be included in the calculation of the CGPAs. Applications and information about deadlines and registration procedures are available at the Registrar's Office. Students should note that space in courses may be limited and therefore applications should be filed well in advance of registration.

Students should consult the Registrar's Office for application forms and information on procedures and deadlines.

Students withdrawing from exchange agreement courses must notify the Registrar's Office by the appropriate deadlines, or a grade of Abs or F may be recorded. There may be financial implications.

International Exchange Agreements

Undergraduate students may be eligible to take advantage of other exchange agreements with universities throughout the world. For details on these exchanges, students should consult with the Registrar's Office and the International Student Services Office at least one year in advance of the proposed exchange.

5.3 Minimum Number of Carleton Credits (Residency and Advanced credits)

5.3.1 Residency Credits

To be eligible for graduation with a Carleton degree, certificate or diploma, each student must present a certain number of credits earned at Carleton University which have not been presented to fulfill any degree that has been previously awarded including a degree or degrees at Carleton University. These are referred to as residency credits. Courses taken under the University of Ottawa Exchange Agreement do not count as residency credits.

All degree students must present a minimum of 5.0 residency credits at graduation.

Due to accreditation requirements, the minimum number of residency credits for students in the Faculty of Engineering and Design is half of the total number of credits required in the program.

To obtain an undergraduate certificate from Carleton University, students must present residency credits including a minimum of 4.0 credits taken at Carleton. In the case of certificates taken concurrently with a Carleton degree, residency for the certificate may be satisfied with credits used also to satisfy the degree residency requirement.

5.3.2 Advanced Credits

The credits presented at graduation that are credits completed at Carleton after admission, credits completed at Carleton within the last ten years for which advanced standing has been granted and credits completed as part of the University of Ottawa Exchange or another formal domestic or international Exchange, must include:

- a) For Honours degrees, at least 3.0 credits in the major and at the 3000-level or above;
- b) For Combined Honours degrees, at least 1.5 credits in each major and at the 3000-level or above;
- c) For General degrees, at least 3.0 credits in the major and at the 2000-level or above;
- d) For any Minor, Concentration or Specialization, at least 2.0 credits;
- e) For a certificate or diploma, all required courses.

6.0 Program Regulations

6.1 The Cumulative Grade Point Average

The Cumulative Grade Point Average (CGPA) is the key assessment tool for performance evaluation. The CGPA is the ratio of the grade points earned on a set of courses to the total credit value of these courses. In calculating the CGPA the grade points contributed by each course are multiplied by the credit value of the course. So, for example, an A+ in a 0.5 credit course contributes $12.00 \times 0.5 = 6.00$ grade points. The CGPA is truncated to two decimal places (with no rounding).

The Overall CGPA includes all courses that satisfy requirements of the student's program or would have satisfied such requirements if a passing grade had been obtained. In particular, an F grade is included in the calculation until it is removed through course repetition or replacement. When a course is repeated, the most recent grade is used. All Carleton credits counting toward advanced standing in the degree program are included in the CGPA calculation. All credits obtained through the University of Ottawa Exchange agreement are included in the CGPA calculation.

Courses Extra to the Degree (ETD), No Credit for the Degree (NCD) or Forfeit are not included in the calculation of the CGPA.

A CGPA calculated for a program element, such as Major or Core, is calculated in the same way using only the courses in the program element.

6.2 Maximum Number of Credits Below the 2000-level

A student may count a maximum of 7.0 credits below the 2000-level toward fulfilment of graduation requirements.

Credits in excess of this limit will be set aside as Extra to the Degree (ETD), No Credit for the Degree (NCD) or Forfeit. This allows students to increase their CGPA by pushing out low grades below the 2000-level through replacement by higher grades at the same level.

6.3 Discredits

A *discredit* is a course registration that results in a grade of F, FND, ABS, UNS.

The discredit has the same credit weight as the course. This definition includes courses taken on a Letter of Permission or on exchange.

A degree student is allowed a maximum of 5.0 credits of discredits after admission to the degree. Students admitted with advanced standing will have the maximum number of discredits adjusted on a *pro-rata* basis. Students in 5.0- or 6.0-credit certificate or diploma programs are allowed 2.0 credits of discredits.

If a student exceeds the maximum number of discredits before graduation they are *Suspended* from the degree, certificate or diploma. The student is Ineligible to Return if the degree uses this decision in place of *Suspension*. See also Section 7: Academic Performance Evaluation.

6.4 Course Load

In most undergraduate programs, the normal course load is the equivalent of 2.5 credits in each of the fall and winter terms and the equivalent of 1.0 credit in each of the early and late periods of the summer term. In some degree programs, the normal load is as much as 3.0 credits in each of the fall and winter terms and up to the equivalent of 1.5 credits in each period of the summer term. Multi-term courses are considered to have their credit weight evenly distributed over the terms. For example, a two-term 1.0 credit course is considered to contribute 0.5 credit to course load in each term.

A student is registered in a course overload if the student is registered in more credit equivalents per term than the normal load for his or her program. Students with an Overall CGPA of 7.00 who have completed a minimum of 4.0 credits at Carleton may choose to register in a course overload, to a maximum of 0.5 credit above the normal course load for their program in each of the fall and winter terms and in either the early or late period of the summer term. Students requiring permission for course overloads beyond these limits should contact the Registrar's Office.

6.5 Restrictions on Program Elements

A course is considered to be *double-counted* if it is used to satisfy both the requirements for:

a) the Major (or Majors) and a Minor (See Note 1, below);

or

b) a Minor, Concentration, or Specialization and any other Minor, Concentration or Specialization (See Note2, below)

At most, 2.0 credits in double-counted courses may be included in the credits offered to fulfil requirements at graduation.

Notes:

1. In this regulation, the Major consists of the credits counting toward the Major CGPA. If the program uses only the Overall CGPA for assessment, then all credits are considered to be in the Major.
2. Item **b)** refers to specializations and concentrations that constitute optional choices. In these cases the Major (s) can be completed with or without a concentration or specialization. The concentrations and specializations of this type are part of the Bachelor of Commerce, Bachelor of International Business, Bachelor of Arts in Political Science, Bachelor of Arts in Economics and Bachelor of Science in Integrated Science.

In other cases, a Concentration or Specialization is contained within the Major and constitutes a required choice for that Major. These Concentrations and Specializations are not included in item b) above.

6.6 Maximum Number of Program Elements

In addition to the student's Major or Majors, the maximum allowed combined number of Minors, Concentrations and Specializations for any student is two. Note that this restriction does not apply to the Co-op Option or to *Mention : Français*.

6.7 Combined Honours Programs

In some cases Combined Honours programs are defined with a single unified Major incorporating the credits from both disciplines. In other cases, for example in the B.A. Honours degree, requirements are established separately by each discipline and combined according to the registration of the student in a particular Combined Honours pattern. In the latter case, when a particular course satisfies the requirements for both Majors, the course will be used to fulfil the requirements for one Major and a different course at the same level will be required to satisfy the other Major.

6.8 Simultaneous and Subsequent Degrees

- a) A student who has graduated with a Carleton University degree in a particular program will not be subsequently admitted to the same degree and program. Specifically, students who have graduated with a:
 - i) B.A., B.Sc. or B.Math. degree may apply subsequently for admission to the same degree if they apply for a different major or, if they

graduated with a General degree, they apply for an Honours degree with the same major.

- ii) B.Eng. or B.I.T. degree may apply subsequently for admission to the same degree only if they apply for a significantly different program. A program with distinct streams constitutes a single program for this rule.
- iii) B.I.D., B.A.S., B.Com., B.I.B., B.C.S., B.Mus., B.Hum., B.S.W., B.J. or B.P.A.P.M. may not apply subsequently for admission to the same degree.
- b) A student who has graduated with a Carleton University degree that includes a minor will not be subsequently admitted to the same minor.
- c) A student who has successfully completed a university degree in a given discipline will not be admitted to a minor in the same discipline in conjunction with subsequent degree studies.
- d) A student will only be admitted to one degree and program at a time. The student's record will show only one active degree and program in any given term. Note that certain Certificates and Diplomas do allow concurrent degree studies.
- e) A Carleton University degree student is not allowed simultaneously to be registered in degree studies at another post-secondary institution without the permission of Carleton University.

6.9 Credit for ESL courses

A student in a degree program may receive credit for previously completed English as a Second Language courses from the sequence ESLA 1300, ESLA 1500, ESLA 1900, ESLA 1905, with the following restrictions:

- a) for students in degrees offered by the Faculty of Arts and Social Sciences or the Faculty of Public Affairs, up to 2.0 credits will be counted toward the degree;
- b) for students in degrees offered by the Sprott School of Business, credit will be allowed only for ESLA 1900 (or ESLA 1905);
- c) for students in degrees offered by the Faculty of Science, credit will be allowed only for ESLA 1900 (or ESLA 1905);
- d) for students in the Bachelor of Engineering degree, no credits from this sequence will be counted toward the degree;
- e) for students in the Bachelor of Industrial Design degree or the Bachelor of Architectural Studies degree, credit will be allowed only for ESLA 1900 (or ESLA 1905).

6.10 Restrictions on Credit for Certain Courses

- 6.10.1 Co-operative Education (Co-op) work term and report courses do not count for credit in any degree.
- 6.10.2 In addition, B.A. students in Economics will not receive credit for MATH courses below the 1000-level.
- 6.10.3 Students in the B.Mus. degree will not receive credit for MUSI 1106 or MUSI 1107.
- 6.10.4 Students in the B.Com. or the B.I.B. degree will not receive credit for BIT 2001, BIT 2002 or any 0000-level mathematics course.

6.10.5 Students in the B.Com. degree will not receive credit for BUSI 3602 or COMP 1001.

6.10.6 Students admitted with advanced standing to the B.Com., B.I.B., B.Hum., B.P.A.P.M., B.I.T. or B.Eng. degree will not receive credit on admission for courses with a grade below C-taken earlier.

6.10.7 For courses excluded from the B.Sc. see the Academic Regulations and Requirements for the Bachelor of Science Degree section of this Calendar. For courses excluded from the B.Math. see the Mathematics programs section of this Calendar.

7.0 Academic Performance Evaluation

7.1 Academic Performance Evaluation for Degree Students

Academic Performance Evaluation as described in this section applies to Degree and Certificate Students. The corresponding process for Special Students is described in Section 9, below.

Note: in addition to the regulations listed below, a number of programs specify additional requirements that must be fulfilled. Consult 7.5 below for additional information regarding: B.A.S., B.Com., B.Hum., B.I.B., B.I.D., B.I.T. B.J., B.Math., B.Mus., B.P.A.P.M., B.Sc. Double Hons. Mathematics and Physics, B.S.W.

The Academic Performance Evaluation is the annual assessment of the student's status in his or her degree. The first evaluation is made, at the end of the winter term, for all students who have completed at least 4.0 credits at Carleton University or on the University of Ottawa Exchange once all final grades are available. Subsequent evaluations occur at the end of the winter term following the completion of a minimum of 4.0 additional credits. A completed course is any course registration, including repeated courses, that results in a grade or notation other than WDN, IP, CTN, Aud or DNC. The basis of the evaluation is the student's Overall CGPA, Major CGPA and, where appropriate, Core CGPA. For students in combined programs Major GPAs are calculated for each major where possible. The evaluation is made by comparing GPAs to the minima required by the student's degree at the time of the evaluation. The possible outcomes of an Academic Performance Evaluation are: *Good Standing*, *Academic Warning*, *Suspension*, *Continue in General*, *Debarment*, or *Ineligible to Return (IR)*.

The status *Good Standing* signifies that a Performance Evaluation has found that the student fully meets the academic standards prescribed for the student's program and is eligible to continue in that degree.

The status *Academic Warning* signifies that the student's performance with respect to the academic standards of the degree is deficient. The student may continue in the degree but must clear the *Academic Warning* by achieving a *Good Standing* assessment at the next Academic Performance Evaluation.

The status *Suspension* signifies that the student must leave his or her degree for at least one year. See also Section 7.1.1 and Section

7.3. *Suspension* occurs if at least one of the following conditions applies:

- the student has an Overall CGPA that is less than 1.00;
- while on *Academic Warning*, the student has failed to achieve a *Good Standing* assessment at the next Academic Performance Evaluation;
- the student has exceeded the maximum allowable number of discredits for the program;
- the student was Admitted with Additional Requirements and has failed to satisfy those requirements.

The status *Continue in General* is applied at an academic performance evaluation (APE) if the student (i) is in an Honours B.A., B.C.S., B.Sc., or B.Math. program, (ii) would be suspended at this APE due to a low CGPA, and (iii) meets or exceeds the minimum requirements for *Good Standing* in a general program. The student will have his or her program changed to the corresponding or a related general program within the same degree and may apply to change this program within the degree, as long as the student would be in *Good Standing* in the subsequent program.

The status *Ineligible to Return* (ITR) indicates that the student's performance has fallen below a minimum standard for the program and in consequence the student is removed from the program, and will never be readmissible to this program. The status *Ineligible to Return* is restricted to some professional and limited enrolment programs where there is high demand for the program and limited space in its required courses. The status *ITR* is assigned if any of the conditions for Suspension apply, in addition to any conditions set by the program. The student is eligible to continue at the University and may apply through Admissions Services for admission to another program.

If a student satisfies the conditions for *Suspended* or *Ineligible to Return* at a performance evaluation in the student's current degree and the student has a previous decision of *Suspended* or *Ineligible to Return* on the record in this or another degree or Special studies, then the student will be removed from the current degree with the standing *Debarred*. A *Debarred* student is not eligible for degree studies at the University for at least three years. See Section 7.3, *Readmission after Suspension or Debarment*.

7.1.1 Discredits

If a course registration in any term results in a student exceeding the allowed number of discredits for the program, then the student will be *Suspended*, *Ineligible to Return*, or *Debarred* as of the end of that term. This action is part of the Academic Performance Evaluation at the end of the winter term, but is not part of a general Academic Performance Evaluation after the summer or fall terms.

7.1.2 Three Failures of a Course (Engineering)

A student in the Bachelor of Engineering program must leave the degree with the status *Ineligible to Return* (ITR) if the student fails one course on three occasions.

7.2 Assessment in Concentrations, Specializations and Minors

In conjunction with the Academic Performance Evaluation, additional averages are calculated for program elements. A CGPA is calculated over the courses contributing to any minor, concentration, specialization. These CGPA results are available for decisions on satisfactory or unsatisfactory performance in the program element. Students with a CGPA that is below the minimum required for a Concentration, Specialization or Minor may be removed from that Concentration, Specialization or Minor.

7.3 Readmission after Suspension or Debarment

Suspension is from a particular degree, not the University. Upon receiving notice of *Suspension* from one degree, students may seek admission, through Admissions Services, to other degrees of the University. Programs may accept such students in *Good Standing* if the student meets those requirements or on *Academic Warning*.

Students who have been Suspended will be inadmissible to their original degree for one year. Students who have been suspended and wish subsequently to be re-admitted to their original degree must petition through the Admission Services, providing an explanation of the circumstances leading up to the *Suspension*, what has occurred during the period of suspension, and what the student's goals now are. See also 4.9.1 (d) for certain special cases.

Debarment is from degree studies at the University. After Debarment, students wishing to be considered for readmission to a Degree or Certificate program, must wait three years and then make an appeal to the Senate Undergraduate Studies Committee. On readmission after Debarment, students may be required to complete certain specific courses and to forfeit certain previously completed credits in order to provide a reasonable expectation of success. The CGPA will be based upon those credits, successful and unsuccessful, accepted upon readmission.

Students returning to the University after *Suspension* or Debarment will not have their CGPA re-started. At the point of re-admission, they may be allowed a pro-rated maximum number of discredits.

7.4 Minimum CGPA Requirements

The standard CGPA requirements used in Academic Performance Evaluation are presented in Table 1. The minimum required CGPA increases with the number of program credits (See Note 1) at the time of the Academic Performance Evaluation. Students with a CGPA close to the minimum at their first assessment will have to improve their academic achievement significantly in order to maintain the *Good Standing* status through to graduation.

The Standard Minimum CGPA Requirements for Minors, Concentrations, and Specializations are presented in Table 2. These are not used in the Academic Performance Evaluation but are used to determine continuation status in the program element.

Table 1: Minimum CGPA Requirements for Good Standing Status

Program credits completed	Honours programs	Engineering and Design programs	General programs 15.0 credits	General programs 20.0 credits
0.0 to 5.0	Overall 4.00	Overall 3.00	Overall 3.00	Overall 3.00
5.5 to 10.0	Overall 4.50	Overall 3.50	Overall 3.50	Overall 3.50

Graduation	Overall 5.00	Overall 4.00	Overall 4.00	Overall 4.00
	Major 6.50		Major 4.00	Major 4.00

Notes:

- The Program Credits are the course credits earned by the courses the student has completed, with either a passing or a failing grade, that would contribute to the credits required for graduation in the student's program had they been passed. The program credits include credits obtained through transfer, advanced standing, letters of permission or exchange. The program credits do not include courses from which the student has withdrawn.
- The General programs requiring 20.0 credits are Biochemistry, Computer Science, Earth Sciences, Physics and Information Technology.
- Certain Honours programs may have different minimum Overall or Major CGPA requirements from those indicated above.

Table 2: Standard Minimum Requirements for Minors, Concentrations and Specializations

Program credits completed	All students in Honours programs	All students in Engineering and Design programs	All students in General programs
0.0 to 5.0	5.00	3.00	3.00
5.5 to 10.0	5.50	3.50	3.50
10.5 to 15.0	6.00	3.50	4.00
15.5 or more	6.50	4.00	

Note: for the General programs in Biochemistry, Computer Science, Earth Sciences, Information Technology and Physics requiring 20.0 credits, the minimum required CGPA is 3.00, 3.50, 3.50, 4.00 respectively.

7.5 Additional Information Concerning Academic Performance Evaluation for Some Degrees

The standard regulations for Academic Performance Evaluation are modified for certain degrees and programs as presented in this section.

Bachelor of Architectural Studies (B.A.S.)

The B.A.S. follows the regulations for Academic Performance evaluation for Engineering and Design Programs with the following additions and amendments:

- The Bachelor of Architectural Studies program does not define a Major CGPA. Students are assessed at each Academic Performance Evaluation using their Overall CGPA and the Core minimum defined in 2 below;
- The Architecture Core consists of the following courses:
ARCS 1005, ARCS 1105 [1.0]
ARCS 2105 [1.5], ARCS 2106 [1.5]
ARCS 3105 [1.5], ARCS 3106 [1.5]
ARCS 4105 [1.5], ARCS 4106 [1.5]
- Good Standing* requires a grade of C- or better in each course of the Architecture Core.
- Students in Architectural Studies are either in *Good Standing* or on *Academic Warning*. Students who satisfy the conditions for *Suspension* at an Academic Performance Evaluation must leave the Architectural Studies program with the status *Ineligible to Return (IR)*.
- Students wishing to continue into the professional M.Arch. degree program must have successfully completed the B.A.S. degree program with an Overall CGPA of 7.00 or better.

Bachelor of Commerce

Students in B.Com. are Honours students. Students in programs of the Eric Sprott School of Business who are not in *Good Standing* at any APE will be required to leave the program with the status *Ineligible to Return (IR)*.

Bachelor of Humanities

The Bachelor of Humanities degree does not distinguish a set of courses forming a Major. Students are evaluated on the basis of their Overall CGPA and their Core CGPA.

Students are in *Good Standing* if the Overall CGPA at least 7.00 and the Core CGPA at least 7.00.

A student who is not in *Good Standing* but has Overall CGPA at least 6.00 and Core CGPA at least 6.00 is on *Academic Warning*.

A student is required to leave the program with the standing *Ineligible to Return* if either:

- the student was on *Academic Warning* and does not achieve *Good Standing* at the next Academic Performance Evaluation,

or

- b) the student has Overall CGPA less than 6.00 or Core CGPA less than 6.00 at any Academic Performance Evaluation.

The Humanities Core

HUMS 1000 [1.0], HUMS 2000 [1.0]
HUMS 3000 [1.0], HUMS 4000 [1.0]

Bachelor of Industrial Design

1. Students in the Bachelor of Industrial Design degree are assessed at each Academic Performance Evaluation using their Overall CGPA and the Industrial Design Core courses. (The Industrial Design program does not distinguish a set of courses forming a Major).

The following evaluation criteria apply:

- a) students are subject to an evaluation at the end of the winter term if they have completed 4.0 credits since admission or since the preceding evaluation;
- b) in addition, students will receive an evaluation of their Industrial Design Core courses at the end of each Winter term as long as they have completed a Core course in the preceding summer, fall or winter terms.

Industrial Design Core Courses

IDES 1300, IDES 1301, IDES 2203, IDES 2300
IDES 2302, IDES 3300 [1.0], IDES 3302
IDES 4301, IDES 4310 [1.5], IDES 4302

2. Good Standing

Good Standing requires a grade of C- or better in each of the Industrial Design Core courses as well as an Overall CGPA at or above the minimum given in Table 1 of Section 7.4.

3. Academic Warning

Students who are not assigned the status *Good Standing* or *Ineligible to Return* will be on *Academic Warning*. The following conditions apply:

- a) a student who is on *Academic Warning* due to a grade less than C- in a Core course, but with an Overall CGPA high enough for *Good Standing* will be given permission to repeat this Core course and must achieve a grade of C- or better before the next evaluation.
- b) a student who is on *Academic Warning* due to an Overall CGPA less than the minimum required for *Good Standing*, and who also has a grade less than C- in a Core course must raise both the Overall CGPA and pass the Core course with a grade of C- or better before the next evaluation. This student must first raise his or her Overall CGPA to a level sufficient to achieve *Good Standing*, if an evaluation were made, before permission will be given to re-register in the Core course.

4. Ineligible to Return

Students satisfying any of the following conditions must leave the Industrial Design program with the status *Ineligible to Return (ITR)*:

- a) have an Overall CGPA that is less than 1.00,

- b) have failed to achieve a *Good Standing* assessment at the next Academic Performance Evaluation while on Academic Warning,
- c) have exceeded the maximum allowable number of discredits for the program,
- d) have failed to satisfy any additional course requirements received on admission,
- e) have received a grade of less than C- in the same Core course twice,
- f) have not completed the program within seven years.

E. Student Conduct**14.0 Academic Integrity****14.1 Introduction**

Carleton University is a community of scholars dedicated to teaching, learning and research. Sound scholarship rests on a commitment to a code of academic integrity that stresses principles of honesty, trust, respect, fairness and responsibility. The University demands integrity of scholarship from all of its members including students. The quality and integrity of academic work is paramount in achieving student success.

The University states unequivocally that it demands academic integrity from all its members. Academic dishonesty, in whatever form is ultimately destructive to the values of the University. Furthermore, it is unfair and discouraging to those students who pursue their studies honestly. The integrity of university academic life and the degrees conferred by the university is dependent upon the honesty and soundness of scholarship. Conduct by any person that adversely affects this process is a serious matter. Students who violate the principles of academic integrity through dishonest practices undermine the value of the Carleton degree. Dishonesty in scholarly activity cannot be tolerated. Any student who violates the standards of academic integrity will be subject to appropriate sanctions.

14.2 The Policy

The University has adopted a policy to deal with allegations of academic misconduct. This policy is expressed in the document *Carleton*

University Academic Integrity Policy, effective July 1, 2006. The policy describes in detail its scope of application, principles, definitions, rights and responsibilities, academic integrity standards, procedures, sanctions, transcript notations, appeal process, and records implications.

The complete policy is available at: carleton.ca/studentsupport

14.3 Academic Integrity Standards

From the Academic Integrity Policy (Section VI)

Effective adherence to academic integrity requires that students understand the meaning of academic dishonesty. The following list describes conduct that violates standards of academic integrity which may lead to the imposition of sanctions pursuant to this policy. It is important to note that this is not a comprehensive list and should not be viewed as exhaustive.

1. Plagiarism

Plagiarism is presenting, whether intentional or not, the ideas, expression of ideas or work of others as one's own. Plagiarism includes reproducing or paraphrasing portions of someone else's published or unpublished material, regardless of the source, and presenting these as one's own without proper citation or reference to the original source. Examples of sources from which the ideas, expressions of ideas or works of others may be drawn from include but are not limited to: books, articles, papers, literary compositions and phrases, performance compositions, chemical compounds, art works, laboratory reports, research results, calculations and the results of calculations, diagrams, constructions, computer reports, computer code/software, and material on the Internet.

Examples of plagiarism include, but are not limited to:

- submitting a takehome examination, essay, laboratory report or other assignment written, in whole or in part, by someone else;
- using ideas or direct, verbatim quotations, paraphrased material, algorithms, formulae, scientific or mathematical concepts, or ideas without appropriate acknowledgment in any academic assignment;
- using another's data or research findings;
- submitting a computer program developed in whole or in part by someone else, with or without modifications, as one's own;
- failing to acknowledge sources through the use of proper citations when using another's works and/or failing to use quotation marks.

2. Unauthorized Resubmission of Work

A student shall not submit substantially the same piece of work for academic credit more than once without prior written permission of the course instructor in which the submission occurs. Minor modifications and amendments, such as phraseology in an essay or paper do not constitute significant and acceptable reworking of an assignment.

3. Unauthorized Cooperation or Collaboration

An important and valuable component of the learning process is the progress a student can make as result of interacting with other students. In struggling together to master similar concepts and problems and in being exposed to each other's views and approaches, group of students can enhance and speed the learning process. Carleton University encourages students to benefit from these activities. However, it is also critically important that each individual student's abilities and achievements form the basis of the evaluation of that student's progress. As result, while collaboration is supported as being beneficial for various components of course and is generally encouraged, instructors typically limit the amount of collaboration allowed and communicate this to students in the course outlines. To ensure fairness and equity in assessment of term work, students shall not cooperate or collaborate in the completion of an academic assignment, in whole or in part, when the instructor has indicated that the assignment is to be completed on an individual basis. Failure to follow the instructor's directions regarding which assignments, or parts of assignments, should be completed by the individual alone will be considered violation of the standards of academic integrity.

4. Misrepresentation

Students shall not submit or present false assignments, research, credentials, or other documents or misrepresent material facts for any academic purpose. Examples of misrepresentation include but are not limited to:

- research or lab results and data;
- concocted facts or references;
- medical or compassionate certificates;
- admission documents;
- letters of support or other letters of reference;
- academic records, transcripts, diplomas or other registrarial records;
- misrepresenting the date or time of submission;
- changing a score or record of an examination result and/or
- altering graded work for resubmission.

5. Impersonation

It is a violation of the standards of academic integrity to impersonate another person or enter into an arrangement with another to be impersonated by any means for the purposes of gaining academic advantage including in the taking of examinations, tests, or the carrying out of laboratory or other assignments.

6. Withholding

It is a violation of the standards of academic integrity to withhold records, transcripts or other academic documents to mislead or gain unfair academic advantage.

7. Obstruction and Interference

It is a violation of the standards of academic integrity to obstruct or otherwise interfere with the scholarly activities of another

in order to gain unfair academic advantage. This includes but is not limited to interfering or tampering with data or files, with human or animal research subjects, with a written or other creation (e.g. painting, sculpture, file), with a chemical used for research, with any other object or study or research device or with library, electronic or other materials intended for academic use.

8. Disruption of Classroom Activities or Periods of Instruction

Carleton University has a commitment to provide a safe environment for learning. It is a violation of the standards of academic integrity for student registered in class to disrupt the class or other period of instruction with any action or behaviour reasonably judged by the instructor, lab assistant or tutorial assistant to be detrimental to the class. Normally disruption of activities outside of the classroom or outside of periods of instruction or by a student not registered in the class is dealt with under the *Student Rights and Responsibilities Policy*, but in particular cases may be subject also to this Policy.

9. Improper Access

It is a violation of the standards of academic integrity to improperly obtain access to confidential information such as examinations or test questions or to gain undue academic advantage as result of such behaviour.

10. Improper Dissemination

It is a violation of the standards of academic integrity to publish, disseminate or otherwise make public to third party without prior written consent, confidential information. Confidential information includes but is not limited to academic information, data or documents which are not otherwise publicly available and which have been gathered or held with reasonable expectation of confidentiality. In particular, students are expected to follow the Carleton University Policies and Procedures for the Ethical Conduct of Research.

11. Assisting in the Violation of the Standards of Academic Integrity

To assist anyone in violating the standards of academic integrity is itself violation of academic integrity standards and subject to this policy. For example, giving another student an assignment that you have submitted for another class and allowing that student to copy parts of the assignment and submit it as his/her own work would be a violation of this policy.

12. Tests and Examinations

The University is committed to ensuring fairness and consistency in the completion of examinations. As part of this commitment, students are required to follow proper examinations procedures. A student who commits a violation of this policy on an examination, test, or takehome examination, or obtains or produces an answer or unfair

advantage by deceit, fraud, or trickery, or by an act contrary to the rules of the examination are subject to the sanction under this Policy.

These rules include but are not limited to:

- bringing to the examination/test room any textbook, notebook, memorandum, other written material or mechanical or electronic device not authorized by the examiner
- writing an examination or part of it, or consulting any person or materials outside the confines of the examination room without permission to do so
- leaving answer papers exposed to view
- attempts to read other students' examination papers and/or speaking to another student (even if the subject matter is irrelevant to the test).

A violation of this policy may also occur by breaching one of the formal examination rules included on the back of the examination booklet. (These rules are outlined in Appendix A of the Policy, and in Section 14.6 of these Regulations.)

14.4 Procedures

Instructors, advisors and/or supervisors must report all suspected cases of violation of the *Academic Integrity Policy* to the Faculty Dean. Details of the procedures to be followed in the event of a suspected violation can be found in Section VII, Procedures, of the *Carleton University Academic Integrity Policy* at carleton.ca/studentssupport

14.5 Sanctions

In cases where an investigation determines that a violation of the *Academic Integrity Policy* has occurred, sanctions may be applied by the Faculty Dean, the Provost and Vice President (Academic), or by Senate Executive.

Sanctions may include but are not limited to completion of a remediation process, a written reprimand, assignment of a failing grade, withdrawal from a course, suspension from a program, suspension or expulsion from the University. Sanctions may be used independently or in combination for any single violation. This list is not exhaustive and intended only as a guide. For a complete description of possible sanctions, consult Section IX, Sanctions, of the *Carleton University Academic Integrity Policy*, available at: carleton.ca/studentssupport

14.6 Examination Regulations

The University is committed to ensuring fairness and consistency in the completion of examinations. As part of this commitment, students are required to follow proper examinations procedures. An instructional Offence may occur by breaking one of the following formal examination rules that are also included on the back of the examination booklet:

- a) You may not bring to your seat in the Examination Room, or during the examination refer to, any books, papers,

audio or electronic devices or other aids unless the use of such material/equipment is authorized by the examiner on the examination paper.

Applications for deferred final examinations must be made in writing at the Registrar's Office by the deadline shown in the Undergraduate Calendar.
- g) The only time you may leave the Examination Room with the intention of returning is to use the washroom. You must sign out, and back in, on the sheet provided.

Students with concerns regarding discrimination, harassment, stalking, sexist or racist behaviour, or any other prohibited action as outlined in the Human Rights Policy, should call or meet with a member of Equity Services for advice and guidance on how to handle the situation. This service is confidential and does not compel the student to take any further action.

Formal complaints must be made in writing and directed to the Dean or Vice President responsible for the area where the complaint took place. Staff in Equity Services are available to assist with the preparation of a formal complaint. Complaints must be made within 12 months after the last alleged incident of discrimination or harassment unless exceptional circumstances apply in which case the University Secretary may grant an extension of up to an additional 12 months.

15.4 Formal Procedures

The procedure for formal complaints is outlined below:

1. An allegation shall be made in writing to the Dean of the Faculty in which the program to which the respondent has been admitted belongs or, in the circumstances where the respondent has not been admitted to a program, to the Dean of the Faculty where the majority of courses in which the respondent has registered are administered. An allegation against a student in residence when made by another student in residence which involves the complainant's enjoyment of her/his accommodation shall be made to the Vice-President (Academic). The Dean, or the Vice-President (Academic), as the case may be, shall cause to have an investigation conducted and, upon receipt of the report of the investigation, shall either 1) dismiss the allegation on the grounds of insufficient evidence or lack of jurisdiction by the University, or 2) accept that the allegation is founded and seek the agreement of the respondent to a remedy, or 3) refer the matter to the President. A Dean's dismissal of the allegation may be appealed, within ten working days, to the Vice-President (Academic) who may, in turn, either 1) again dismiss the allegation, or 2) accept that the allegation is founded and propose a remedy to the respondent, or 3) refer the matter to the President. In the case of students in residence, where the original allegation has been made to the Vice-President (Academic) and is dismissed, appeal shall be directly to the President who may either 1) again dismiss the allegation, or 2) accept that the allegation is founded and propose a remedy to the respondent, or 3) refer the matter to a tribunal appointed by the Senate.
2. In the instance where the matter has been referred to the President, the latter shall decide whether the University shall conduct a hearing before a tribunal appointed by the Senate.

If the allegation is proven, the tribunal shall decide upon one of the following sanctions:

The student may be:

- a) expelled;
 - b) suspended for a period of time from all studies at the University;
 - c) restricted in his/her use of University facilities;
- and/or**
- d) given a reprimand.

Should the President decide not to conduct a hearing before a tribunal, the allegation shall be deemed to have been dismissed, but the President shall give written reasons for

such a decision, and these reasons shall be communicated to the parties involved.

3. In the instance where the complainant wants redress from the University without the involvement of the respondent, or where the respondent is unknown or is not a member of the University community, and/or where there is a claim that the University has failed or has been negligent in providing a safe, non-hostile environment, the allegation of an offence shall be made in writing to the President, who shall cause an investigation to be conducted. Declared and Undeclared Students

Students who are registered in a program within the degree are called Declared students. Most students designate a program of study when they first apply for admission and so begin their studies as Declared students. Students may also choose to begin their studies within the B.A. degree without being registered in a program. These students are referred to as Undeclared. The recommended course pattern for Undeclared students is outlined under *Undeclared* in the **Programs** section of this Calendar. Undeclared students must apply to enter a program before beginning their second year of study. The Student Academic Success Centre offers support to Undeclared students in making this decision.

Change of Program Within the B.A. Degree

Students may transfer to a program within the B.A. degree, if upon entry to the new program they would be in *Good Standing*. Other applications for change of program will be considered on their merits; students may be admitted to the new program in *Good Standing* or on Academic Warning. Students may apply to declare or change their program within the B.A. Degree at the Registrar's Office according to the published deadlines. Acceptance into a program or into a program element or option is subject to any enrolment limitations, specific program, program element or option requirements, as published in the relevant Calendar entry.

Minors, Concentrations and Specializations

Students may apply to the Registrar's Office to be admitted to a minor, concentration or specialization during their first or subsequent years of study. Acceptance into a minor, concentration or specialization requires that the student be in *Good Standing* and is subject to any specific requirements of the intended Minor, Concentration or Specialization as published in the relevant Calendar entry.

Courses from Other Faculties and Schools

Students must consult the Registrar's Office about registering in courses in Engineering, Industrial Design, and Architecture. Science and interdisciplinary courses are generally acceptable. Professional courses in Engineering, Industrial Design and Architecture are generally not acceptable. Performance courses in Music are open only to students in certain Music programs. Professional courses in Journalism are not acceptable electives in B.A. programs. A limited number of Architecture courses are permitted in certain programs. Students wishing to take courses in Engineering, Industrial Design, or Architecture that are not part of their program or which are not listed as being open to students in the Faculty of Arts and Social Sciences and the Faculty of Public Affairs and Management must obtain prior permission from the Department(s) of their Major, and from the unit offering the course.

Mention : Français

Students registered in certain B.A. programs may earn the notation *Mention : Français* by completing part of their requirements in French and by demonstrating a knowledge of the history and culture of French Canada. The general requirements are listed below. For more specific details consult the departmental program entries.

Students in a B.A. Honours program must present:

1. 1.0 credit in French language;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level and 1.0 credit at the 4000-level in the Honours discipline taken in French.

Students in a B.A. General program must present:

1. 1.0 credit in advanced French;
2. 1.0 credit devoted to the history and culture of French Canada;
3. 1.0 credit at the 2000- or 3000-level in the Major discipline taken in French.

Students in Combined Honours programs must fulfil the *Mention : Français* requirement in both disciplines.

Courses taught in French (**Item 3**, above) may be taken at Carleton, at the University of Ottawa on the Exchange Agreement, or at a francophone university on a Letter of Permission. Students planning to take courses on exchange or on a Letter of Permission should take careful note of the residence requirement for a minimum number of Carleton courses in their programs. Consult the *Academic Regulations of the University* section of this Calendar for information regarding study on Exchange or Letter of Permission.

Academic Regulations and Requirements for the Bachelor of Engineering Degree

The regulations presented in this section apply to all Bachelor of Engineering programs.

Academic Performance Evaluation for Engineering

In addition to the requirements presented here, students must satisfy the University regulations common to all undergraduate students including the process of Academic Performance Evaluation (see the *Academic Regulations of the University* section of this Calendar), with the following additions and amendments:

1. In Engineering programs, all credits are included in the Major CGPA, making it identical to the Overall CGPA.
2. Students who are not assigned the status *Good Standing* or Academic Warning will be required to leave the degree with the status *Ineligible to Return (ITR)* to the Faculty of Engineering.

Graduation

Students in Engineering programs are covered by the common University regulations regarding graduation, with the following additions and amendments.

1. Students entering an Engineering program with Advanced Standing will receive transfer credit for at most ten of the credits required for their program.
2. Students must take a minimum of 1.0 credit of complementary studies at Carleton University.

Course Load

Regulations regarding Course Load and Overload can be found in the *Academic Regulations of the University* section of this Calendar. The normal course load in Engineering is defined as the number of credits required in the student's program for the current year status of the students. Since the programs in Engineering require more than 20.0 credits in total, the normal course load is more than 5.0 credits in some years of the program. Registration in more than this number of credits constitutes an overload.

Co-operative Education Programs

All Engineering programs are available with or without participation in the Co-operative Education option.

Year Status for Engineering

In the Bachelor of Engineering Degree program, Year Status is defined as follows.

- 1st year: Admission to the program.
- 2nd year: Successful completion of all Engineering, Science and Mathematics course requirements in the first year of the program, all English as a Second Language Requirements, and any additional requirements as determined in the admissions process.
- 3rd year: Successful completion of 4.0 credits from the second year requirements of the program.
- 4th year: Successful completion of all second year requirements and 3.5 credits from the third year requirements of the program.

Year Status Prerequisites

Year Status in Engineering is used in some course prerequisites to limit access to only those students who have sufficient preparation. In particular students will not have access to second, third or fourth year engineering, science or mathematics courses until they have achieved second year status. Similarly, to take some specific engineering, science and mathematics courses in third or fourth year, that year status must be achieved. For additional information on prerequisites, see the individual course descriptions.

Time Limit

The Bachelor of Engineering degree must be completed within eight calendar years of initial registration. Students who do not complete their program requirements within this limit will be Ineligible to Return.

Academic Appeals

The Engineering Committee on Admission and Studies handles all academic appeals.

Academic Regulations and Requirements for the Bachelor of Industrial Design

The regulations presented in this section apply to all students in the Bachelor of Industrial Design program.

Co-operative Education

carleton.ca/cdce

Co-operative Education is based on the principle that academic study, combined with alternating work periods, is desirable for effective professional preparation. Work periods allow students to acquire experience in the area of career interest, while the academic terms can be devoted to fundamental and theoretical studies. The practical experience is not a substitute for, but rather a complement to, academic studies.

The following programs have approved Co-operative Education options:

Faculty of Arts and Social Sciences

Anthropology, Cognitive Science, Sociology

Sprott School of Business

Accounting, Business General, Finance, Information Systems, International Business, Managing People and Organizations, Marketing, Operations Management

Faculty of Engineering and Design

Aerospace Engineering, Architectural Studies, Biomedical and Electrical Engineering, Biomedical and Mechanical Engineering, Civil (includes Management), Communications Engineering, Computer Systems Engineering, Electrical Engineering, Environmental Engineering, Engineering Physics, Industrial Design, Information Technology, Mechanical Engineering (includes Integrated Manufacturing), Software Engineering, Sustainable and Renewable Energy Engineering

Faculty of Public Affairs

Economics, Law (includes Concentration in Business Law, Concentration in Law, Policy, and Government), Mass Communication, Political Science (includes Concentration in Canadian Politics, Comparative Politics and Area Studies, Gender and Politics, International Relations, Political Theory and Public Affairs and Policy Analysis), Public Affairs and Policy Management (includes Communication and Information Technology Management, Development Rights, Human Rights, International Studies, Public Policy and Administration, Social Policy, and Strategic Public Opinion and Policy Analysis)

Faculty of Science

Applied Physics, Biochemistry, Bioinformatics, Biology, Biology and Biotechnology, Biology and Physics, Biostatistics, Biochemistry and Biotechnology, Chemistry, Chemistry and Physics, Computational Biochemistry, Computational Biology, Computational Chemistry, Computer Mathematics, Computer Mathematics Information Technology, Computer Science (including Software and Computing, Management and Business Systems, Software Engineering, Network Computing, Computer and Internet Security, Bioinformatics, Psychology, Law), Computer Science and Mathematics, Computer Statistics, Earth Sciences, Economics and Mathematics, Economics and Statistics, Environmental Science, Mathematics with Physics, Mathematics with Specialization in Stochastics, Neuroscience, Physics and Statistics

The Work/Study Sequence

Each academic program establishes a work-study pattern that is designed to meet the academic needs of the student, and to ensure that they are scheduled to work during periods that are supported by industry need.

The work-study sequence and number of mandatory work terms varies according to the individual program.

Four-month, eight-month, twelve-month or sixteen-month work terms may be available. Please see specific programs for details. Students are normally expected to complete the full complement of work terms in the prescribed academic term/work term sequence. Students in Co-operative Education require an additional year to complete their degree program.

Co-operative Education Admission and Participation Requirements

Application

Students not originally admitted to Carleton University with the Co-op option for their program must apply for admission to the Co-operative Education program through the Career Development and Co-operative Education Office website at carleton.ca/cdce. The application deadline for Co-operative Education program is the same as the deadline for regular course registration.

All student must complete COOP 1000 and obtain a grade of *Sat* prior to participation in any job placement activities. COOP 1000 can be taken as an overload (i.e., sixth course). Registration in COOP 1000 is restricted to Co-operative Education students and applicants.

English Language Proficiency

Students admitted to Carleton based on CAEL, IELTS or TOEFL assessments and required to take an ESL course are also required to take the Oral Proficiency in Communicative Settings (OPECS Test) and attain a minimum score of 5.0. Students register for this test through the Career Development and Co-operative Education office.

Additional Program Prerequisites

Each academic program that offers a Co-op option may have specific prerequisite requirements in addition to those of the Co-operative Education program. Consult the Regulation – Admissions Requirements for Undergraduate Degree Programs section of this Calendar for specific prerequisite details.

Graduation Requirements

Students in the Co-operative Education program must satisfy all requirements for their degree program as well as the graduation requirements specific to the Co-operative Education option in order to graduate with the Co-operative Education designation.

Communication

Students are expected to maintain communication with the Career Development and Co-operative Education Office on all matters pertaining to their participation in the Co-operative Education program and the regulations and procedures for their Co-operative Education option.

Continuation Requirements

Once admitted to the Co-operative Education option, students must meet the general continuation requirements and program-specific requirements as described below to participate in job application through the Co-operative Education placement process.

- Students must maintain a CGPA of 8.00 or better, and an overall CGPA of 6.5 or better.

Architecture

- Students must participate in a minimum of three work terms, at least two of which are consecutive.

Computer Science (including Software and Computing, Management and Business Systems, Software Engineering, Network Computing, Information Systems Security, Bioinformatics, Psychology, Law), Computer Science and Mathematics, Computer Statistics

- Students must maintain a CGPA of 8.00 or better, and an overall CGPA of 8.0 or higher.

Economics

- Students must have a major CGPA of 8.00 or higher and an overall CGPA of 8.00 or higher.

Industrial Design

- Student must maintain a CGPA of 8.00 or better in industrial design core courses and an overall CGPA of 6.5 or better.

Information Technology

- Students must maintain a CGPA of 8.00 or better.

Law

- Students must have obtained an overall CGPA of 8.00 at the end of the first three terms of study if applying to do their first work term in the summer following the second year of study;
- Students must have obtained and maintained an overall CGPA of 6.5 and a major CGPA of 8.0 at the end of the first five terms of study, for the purposes of entry to any work term following completion of the third year of study;

Note: students participating in the Co-operative Education program are limited to a maximum registration of 0.5 credit during a work term, with the exception of Public Affairs and Policy Management students, who are permitted to register in the 1.0-credit Honours research essay/project during a work term.

It is expected that students will not register in an academic course that conflicts with their hours of work.

Work Term Assessment

Successful completion of a work term is achieved by the submission of a satisfactory work term report and receipt of a satisfactory evaluation from the employer. Students are expected to submit a written work term report at the end of each four-month work term. Co-operative Education students will be assessed on their work performance by their workplace supervisor.

An unsatisfactory work term report or a poor assessment in the workplace will not affect students' academic progress, but may result in their being withdrawn from the Co-operative Education option.

Employer Performance Evaluations

Each work term employer will be required to evaluate the student's performance. An unsatisfactory evaluation is investigated by the Career Development and Co-operative Education Office and may result in a work term failure being recorded on the Career Development and Co-operative Education Student Record. Employer evaluations are not recorded on a student's transcript.

Voluntary Withdrawal from the Co-operative Education Option

Students may withdraw from the Co-operative Education option without penalty during a study term. Such students are eligible to continue in their regular program provided they meet the academic standards required for continuation in that program.

Required Withdrawal from the Co-operative Education Option

Students may be required to withdraw from the Co-operative Education option for one or more of the following reasons:

- Submission of an unsatisfactory work term report or receipt of an unsatisfactory employer evaluation;
- Failure to report to an employer or leaving an employer without prior approval;
- Failure to attend all pre-arranged interviews with employers;

- Failure to achieve a *Sat* grade in COOP 1000 before registering in the first work term course;
- Participating in the placement process arranged by the Career Development and Co-operative Education Office after receiving a job offer resulting from independent job search.

Students will lose their Co-operative Education status for one of the following:

- Declining a second job offer during the placement process;
- Dismissal with cause by an employer;
- Failure to pay the pre-work-term charge and work-term fee by the appropriate dates;
- Failure to register for a co-operative education work-term report course.

Employment

Although every effort is made to find a sufficient number of work term positions for all students enrolled in Co-operative Education, no guarantee of employment can be made. The employment process is competitive and dependent on market conditions. Academic performance, skills, motivation, maturity, attitude and potential will determine whether a student is offered a job. It is the student's final responsibility to secure an available position through successful participation in the competitive interview process and their own job search activities. Students who are unable to obtain suitable employment are expected to continue their academic program on a full-time basis. The summer term is the only exception to this rule.

Graduation with Co-operative Education Designation

Students who successfully complete the specified number of co-operative education work term courses in addition to the requirements of their regular program will receive a Co-operative Education designation on the final transcript and diploma.

Disciplines requiring four satisfactorily-completed co-operative education work terms:

Engineering (Aerospace, Biomedical and Electrical, Civil, Biomedical and Mechanical, Environmental, Mechanical, Communications, Computer Systems, Electrical, Engineering Physics, Software, Sustainable and Renewable Energy), Accounting, Business General, Finance, Information Systems, International Business, Managing People and Organizations, Marketing, Operations Management, Computer Science, Mathematics and Statistics, Mathematics with Physics, Mathematics with Specialization in Stochastics, Statistics

Disciplines requiring three satisfactorily-completed co-operative education work terms:

Anthropology, Applied Physics, Architectural Studies, Biochemistry, Biochemistry and Biotechnology, Bioinformatics, Biology, Biology and Biotechnology, Biology and Physics, Biostatistics, Chemistry, Chemistry and Physics, Cognitive Science, Computational Biology, Computational Biochemistry, Computational Chemistry, Earth Sciences, Economics, Economics and Mathematics, Economics and Statistics, Environmental Science, Industrial Design, Information Technology, Business Law, Law, Policy and Government, Mass Communication, Physics, Political Science), Public Affairs and Policy Management (Communication and Information

Technology Management, Development Rights, Human Rights, International Studies, Public Policy and Administration, Social Policy, and Strategic Public Opinion and Policy Analysis), Sociology

Standing and Appeals

The Career Development and Co-operative Education Office administers the regulations and procedures applicable to the co-operative education programs and will report instances of a student's failing a work term or being required to withdraw from their co-operative education option to their academic department. Any decision of the Career Development and Co-operative Education Office may be appealed through the normal channels within the University.

Co-operative Education Regulations

Co-operative Education students are responsible for satisfying all co-operative education regulations for their program.

Registration

All work terms must be completed before the beginning of the final academic term. Co-operative Education students must be registered as full-time students in all academic terms of the Co-operative Education option from point of entry through to the final academic term. The definition of full-time for Co-operative Education students is a minimum of 2.0 credits each study term. The only exception occurs when a student may have sufficient credits to be able to register as a part-time student in the final term. During a work term, co-operative education students must register in one of the following work term report courses appropriate for their program.

Architectural Studies

School of Architecture
(Faculty of Engineering and Design)
202 Architecture Bldg.
613-520-2855
arch.carleton.ca

This section presents the requirements for:

- **Bachelor of Architectural Studies (B.A.S.)**

The Co-operative Education Option is available with the Bachelor of Architectural Studies.

The School of Architecture cooperates with the School for Studies in Art and Culture in offering the B.A. Honours and B.A. General programs in History and Theory of Architecture (see the Art History program section of this Calendar for details).

Graduation Requirements

In addition to the requirements listed below, students must satisfy the University regulations (see the *Academic Regulations and Requirements of the University* section of this Calendar), and the Academic Regulations and Requirements of the Bachelor of Architectural Studies.

Students should consult the School when planning their program and selecting courses.

Academic Performance Evaluation for Bachelor of Architectural Studies

1. The Bachelor of Architectural Studies program does not define a Major CGPA. Students are assessed at each Academic Performance Evaluation using their Overall CGPA and the Core minimum defined in 2 below.
2. The Architecture Core consists of the following courses: ARCS 1005, ARCS 1105 [1.0], ARCS 2105 [1.5], ARCS 2106 [1.5], ARCS 3105 [1.5], ARCS 3106 [1.5], ARCS 4105 [1.5], ARCS 4106 [1.5].
3. *Good Standing* requires a grade of C- or better in each course of the Architecture Core.
4. Students in Architectural Studies are either in *Good Standing* or on Academic Warning. Students who satisfy the conditions for *Suspension* at an Academic Performance Evaluation must leave the Architectural Studies program with the status *Ineligible to Return (ITR)*.
5. Students wishing to continue into the professional M.Arch. degree program must have successfully completed the B.A.S. degree program with an Overall CGPA of 7.00 or better.

Program Requirements

Course Sequence

In the first, second, and third year of the program, studios must be taken in sequence. In the fourth year, studios may be taken out of sequence, with the permission of the CSPA.

The Architectural Technology courses required in the third and fourth year of the program interact closely with Design Studios and are accompanied by certain co-requisites and prerequisites. This requirement reflects the interrelationship between assignments of Technology courses and Design Studios. Students should consult the course descriptions carefully when planning their registration.

Retention of Work

Keeping a good portfolio is a most important part of architectural education. A portfolio represents a record of the student's progress and design experience over the years, and is an indispensable requirement for any future job application. A portfolio is started in first year and continues to expand until graduation. The School, therefore, requires that each student produce reductions (normally 8 1/2 x 11 inch reproductions, colour or black and white, slides, and/or digital format CD) of his or

her work at the end of each term. One copy of the work should be put in the student's portfolio and the other turned in to the instructor for retention in the School's archives. (This facilitates retrospective exhibitions of work, accreditation, publications and any future references for pedagogic purposes.) Original work is the property of the students, but the School retains the right to keep work of merit for up to two years after the date of submission. The School will make every effort to preserve the work in good condition, and will give authorship credit and take care of its proper use.

Bachelor of International Business (Honours) Program Requirements

The Bachelor of International Business (B.I.B.) program is characterized by the requirement that students spend third year in studies abroad.

Students in the B.I.B. program are required to specialize in one of the following languages: French, German, Italian, Japanese, Mandarin, or Spanish.

Language Training Component

Students may select French, German, Italian, Japanese, Mandarin, or Spanish as their specialization language for study. Applicants to the program should indicate both a first and second choice, as their first choice may be oversubscribed. Students are strongly advised to continue study and use of their selected language independently, in the summers between academic years. Failure to do so may seriously undermine success during the year of study abroad.

Applicants to the program interested in languages other than those listed above should contact the Eric Sprott School of Business Supervisor of Undergraduate Programs to verify if the preferred language option may have become available after the publication of this calendar.

All first year Bachelor of International Business students will be assessed for ability in their selected language by the relevant language unit and placed in the appropriate courses as authorized by the language unit.

Students with some ability in their selected language may be allowed to pursue studies in that language on the understanding that they will effect a significant improvement in their ability.

The language credits must be prespecified by course numbers by the selected Language units. Students are advised not to register in courses before they have been specified.

The Year Abroad

The third year of study will be spent taking a set of courses at a foreign institution approved by the Eric Sprott School of Business.

In order to be eligible to study abroad in third year, students must be in *Good Standing* and are required to have successfully completed a minimum of 9.0 credits:

- 4.0 credits in the specified Language Core (3.0 credits in the case of Japanese and Mandarin), and
- 5.0 credits in Business and Economics from the Major requirements below the 3000-level (6.0 credits in the case of Japanese and Mandarin).

The number of courses available in English in foreign schools may vary. Students will take up to 5.0 credits as outlined below. Carleton credits commensurate to courses taken abroad will be determined by the Registrar's Office and awarded towards the student's degree.

At least 1.0 credit of the courses taken abroad must be delivered in the student's selected language.

Students are responsible for all traveling, living and incidental costs for fulfilling third-year requirements abroad. Tuition fees and compulsory miscellaneous fees will be paid to Carleton University according to Carleton University's fee structure. The student may be liable for compulsory miscellaneous fees assessed by the foreign institution.

A limited number of bursaries are available to offset costs. For details on how to apply for a bursary, contact the Awards Office.

Proficiency is normally demonstrated through the completion of 1.0 credits in French (FREN 1100 [1.0], FREN 2100 [1.0], FINS 2105 and FINS 3105 or approved equivalent) or ALSS 1900 (or approved equivalent). For students who consider that they have proficiency in French, the School of Canadian Studies conducts a French language examination in September and January. For students who consider that they have proficiency in an Aboriginal language, the onus is on the student to provide suitable documentary evidence of proficiency to the School of Canadian Studies.

Students should consult the School when planning their program and selecting courses.

Field Placement Practicum

The Field Placement Practicum (CRCJ 3901) is offered at the 3000-level to students in CCJ programs. Students complete a 1.0 (or 2.0) credit Field Placement Practicum course during the fall/winter session. To be eligible for the Practicum students must have completed at least 9.0 credits, including all of the 1000- and 2000-level requirements in the Major CGPA. Enrolment is restricted. A floating cutoff will be used to identify the students with the highest Major CGPA over those required courses, who may then receive permission to register for the Field Placement. Allocation of Field Placements will be determined by the Field Placement Coordinator.

Students wishing to register for a Field Placement Practicum must apply to the Institute no later than **May 1** of their second year. Applications are available at carleton.ca/criminology after January 1. If granted permission, students will then register in CRCJ 3901 [1.0] during registration. Students in the B.A. Honours program may receive permission to complete a 2.0 credit placement, in which case they will also register in CRCJ 3902 [1.0].

The list will change from year to year and only courses on the list valid in the year the course is taken, or courses for which formal approval of the Faculty has been obtained can be used as credit toward an engineering degree. English as a Second Language courses are not acceptable for use as Complementary Studies electives in any engineering program. Courses not on the list may be used to fulfil a Complementary Studies elective requirement with the permission of the Faculty of Engineering and Design and provided all other specified course requirements are met. Registration in CUTV sections is not acceptable. Note that access to courses on the list is not guaranteed and may depend on space availability and the satisfaction of other requirements including, for example, course prerequisites. Students must take a minimum of 1.0 credit of complementary studies at Carleton University.

The following course categories are used in the specification of History programs.

The following field definitions are used to classify history courses:

- a) the world before 1750

- c) North America
- d) Asia, Africa, and Latin America
- e) ideas, culture, and society

The field classification of each course is included with the course description. Courses that do not have a history field classification cannot be used to meet the history field requirements of degree programs in History.

This section presents the requirements for:

- Humanities – B.Hum. Honours
- Humanities – B.Hum. Combined Honours
- Biology and Humanities – B.Hum. Combined Honours

Graduation Requirements

In addition to the requirements listed below, students must satisfy the University regulations, including the process of Academic Performance Evaluation (see the *Academic Regulations of the University* section of this Calendar).

Students should consult the College and its Web site when planning their program and selecting courses.

Academic Performance Evaluation

The Bachelor of Humanities degree specifies that all credits are included in the Major CGPA, making this average identical to the Overall CGPA. Students are evaluated on the basis of their Overall CGPA and their Core CGPA.

Students are in *Good Standing* if the Overall CGPA = 7.00 and the Core CGPA = 7.0.

A student who is not in *Good Standing* but has Overall CGPA = 6.00 and Core CGPA = 6.00 is on Academic Warning.

A student is required to leave the program with the status *Ineligible to Return* if either:

1. the student was on Academic Warning and does not achieve *Good Standing* at the next Academic Performance Evaluation, or
2. the student has Overall CGPA of less than 6.00 or Core CGPA of less than 6.00 at any Academic Performance Evaluation.

The Humanities Core

HUMS 1000 [1.0], HUMS 2000 [1.0]
 HUMS 3000 [1.0], HUMS 4000 [1.0]

Requirement for Full-Time Study

Students in the Humanities program must complete a minimum of 4.0 credits by the end of the summer session. The College may permit students to study abroad for a year while remaining registered in the program. For those students permitted to study abroad, Carleton credits commensurate to studies taken abroad will be determined by the College and awarded towards the

student's degree. In exceptional circumstances (usually financial need or sickness) the College may also permit students to take a leave of absence for one year while remaining registered in the program.

This section presents the requirements for:

- Industrial Design – B.I.D.

Graduation Requirements

In addition to the requirements listed below, students must satisfy the University regulations, including the process of Academic Performance Evaluation (see the *Academic Regulations of the University* section of this Calendar), and the *Academic Regulations and Requirements for the Bachelor of Industrial Design*.

Students should consult the School when planning their program and selecting courses.

Academic Performance Evaluation

Students in Industrial Design are subject to the standard Academic Performance Evaluation process with the following additions and amendments:

1. The Industrial Design program does not define a Major CGPA. Students are assessed at each Academic Performance Evaluation using their Overall CGPA and the Core minimum defined in 2 below.
2. The courses in the Industrial Design Core are as follows:

Industrial Design Core

IDES 1300, IDES 1301, IDES 2203, IDES 2300,
IDES 2302, IDES 3300 [1.0], IDES 3302,
IDES 4310 [1.5], IDES 4301, IDES 4302

Good Standing requires a grade of C- or better in each course of the Industrial Design Core.

3. Students in Industrial Design are either in *Good Standing* or on Academic Warning. Students who satisfy the conditions for *Suspension* at an Academic Performance Evaluation must leave the Industrial Design program with the status *Ineligible to Return (ITR)*.
4. For more information regarding academic performance evaluation in the B.I.D. program, consult the *Academic Regulations of the University*, and *Academic Regulations and Requirements for the Bachelor of Industrial Design Degree* sections of this Calendar.

Prerequisites

The following broad course prerequisites specify requirements for access to upper year project courses.

Registration in IDES 3300 [1.0] normally requires successful completion of all first-year and second-year course requirements (**Items 1, 2, 3, 4** below).

Registration in IDES 4310 [1.5] normally requires successful completion of all third-year course requirements (**Items 5, 6, 7, 8** below).

Absence and Readmission

Students in Industrial Design who intend to be absent for a fall/winter session must request permission from the School in advance. Students who are absent for a fall/winter session without permission will be required to apply for readmission to the program in advance of registration.

General Information

The Integrated Science (ISI) programs offered by the Faculty of Science provide undergraduate students an opportunity to design a program of study that blends a concentration in science with a linked area of specialization in another Faculty. The science concentration can be in any one of the following areas: physical, earth, life, or mathematical (including computer) science in association with specialty areas outside of the Faculty of Science. In this way, the student acquires a depth of understanding of a particular branch of science integrated with knowledge that will aid in the application of that understanding in a professional or employment context.

First-year students must submit their proposed course selection to the IS Director for approval before commencing second year. The progress of all students is monitored by the IS Advisor.

An Honours program and a General program are available. Both require a course of independent study (INSC 4908 [1.0], INSC 3909) as an important element in the program.

Academic Performance Evaluation for IS

The Academic Performance Evaluation for students in Integrated Science is based on the Major CGPA and the Overall CGPA. The Major CGPA is calculated over the combined credits in the Science Sequence and the Non-Science Sequence (13.0 credits for Honours, 9.0 credits for General.)

Integrated Science with a Minor in Business - a science sequence in any of the science areas is combined with a sequence of business courses from the Sprott School of Business that fulfil the requirements for the Minor in Business, allowing for study of the management of science and technology.

Integrated Science with a Minor in Mass Communication - a study of media communications and the public sphere with particular emphasis on the communication of scientific issues and information by combining a science sequence with the requirements for the Minor in Mass Communication.

Journalism

School of Journalism and Communication (Faculty of Public Affairs)

346 St. Patrick's Bldg.
613-520-2600 ext.7404
carleton.ca/jmc

This section presents the requirements for:

- Journalism – B.J. Honours
- Journalism with Concentration in Psychology – B.J. Honours
- Journalism – B.J. Combined Honours

Graduation Requirements

In addition to the requirements listed below, students must satisfy the University regulations including the process of Academic Performance Evaluation (see Academic Regulations section of this Calendar).

Students should consult with the School when planning their program and selecting courses.

Note: students who already hold an undergraduate degree in another field are not eligible to apply for the B.J. (Honours) program. These students should consult the information on the Master of Journalism or the Master of Arts in Communication in the *Graduate Calendar*.

In addition to the graduation requirements of the Faculty, a candidate for the degree of Bachelor of Journalism with Honours must have:

- a) a Major CGPA of at least 6.50,
- b) a grade of C or better in the reporting courses,
- c) a grade of C- or better in each other Journalism course,
- d) an Overall CGPA of at least 5.00, and
- e) the recommendation for graduation by the School of Journalism.

Academic Performance Evaluation in Journalism

Students in the Journalism degree are subject to the standard process of Academic Performance Evaluation for Honours programs with the following exceptions and additions.

1. Continuation to Second Year

Continuation in *Good Standing* after the first Academic Performance Evaluation will be guaranteed only to First-year Journalism students who achieve a B+ or better in JOUR 1000 [1.0] and an Overall CGPA of at least 8.00 in first year on 5.0 full credits. The School also maintains a number of places in second year for students who wish to transfer from Carleton or elsewhere. Normally, offers are made to students with an overall CGPA equivalent to 10.00 (A-) or better.

2. **Continuation in Good Standing** at subsequent Academic Performance Evaluations requires a minimum major CGPA of 6.50 and an Overall CGPA of at least 5.00.

General Prerequisite

Students may not continue into 3000-level or higher courses unless the following three minimum requirements are met:

- a) at least C standing in JOUR 2201 [1.0];
- b) a CGPA of at least 6.50 over the courses JOUR 1000 [1.0], JOUR 2201 [1.0], JOUR 2205 and JOUR 2501;
- c) an Overall CGPA of at least 5.00.

Prohibited Courses

Courses below the 1000-level may not be used for credit in Journalism programs.

Language Requirement

The School requires students to demonstrate proficiency in at least one language other than English, normally French. Students are required to demonstrate such proficiency normally through the completion of any first-year credit (or its approved equivalent) in a language offered at Carleton.

For students who consider that they already have a proficiency in French, the School conducts oral French-language examinations on an ad hoc basis. Students who have completed French Immersion in high school or who have obtained a Bilingual Diploma or Certificate will be regarded as having met the language requirements. For other languages, the onus is on the student to provide suitable evidence of proficiency to the department. In both cases, the student will be required to take an optional credit to replace the language credit.

Students from abroad whose mother tongue is other than English or students whose research interests require another language may obtain permission from the Supervisor of Undergraduate Studies to substitute this language for French.

Departmental Language Requirement

The Department requires Honours students to demonstrate proficiency in at least one language other than English, normally French. Honours students are required to demonstrate such proficiency, normally through the completion of any first-year course (or its approved equivalent) in a language offered at Carleton.

For students who consider that they already have proficiency in French, the Department conducts a French language examination twice a year, in November and February. Students whose high school transcript shows the primary language of instruction to be other than English may apply to have the examination requirement waived. For students who consider themselves proficient

in a second language than French, arrangements may be made to examine the student in that language, depending on faculty resource availability. For students in the Canadian concentration, French must be used to satisfy the language requirement.
